Abstract iii
List of Tables vii
Abbreviations viii

CHAPTER 1
INTRODUCTION 1
1.1 Summary of the chapter 1
1.2 Chronic Disease 1
1.3 Diabetes in Pakistan 2
1.4 Origin of diabetes 4
1.5 Historical background of Diabetes 4
1.6 Sources of blood sugar 4
1.7 Main symptoms of diabetes 5
1.8 Diagnosis of diabetes 6
1.9 Types of Diabetes 7
1.10 Complications of diabetes 8
   1.10.1 Acute complications 8
   1.10.2 Chronic complications 8
1.11 Risks for developing diabetes 8
1.12 Flow chart of study 9

CHAPTER 2
LITERATURE REVIEW 10
2.1 Summary of the Chapter 10
2.2 Overview of Past Literature 11
2.3 Objectives of the Study 29
CHAPTER 3
THEORETICAL FRAME WORK & METHODOLOGY

3.1 Summary of the chapter
3.2 Study design
3.3 Sample size and sampling technique
3.4 Data collection technique
3.5 Study Phases
  3.5.1 Preparatory phase
  3.5.2 Pre-Test
  3.5.3 Data collection phase
  3.5.4 Data analysis phase
3.6 Description of variables under study
3.7 Diagnostic criteria
3.8 Regression analysis
3.9 Categorical variables
  3.9.1 Categorical data analysis
3.10 Type of observation studies
3.11 Probability Structure for contingency tables
3.12 The Odds Ratio
  3.12.1 Confidence interval for odd-ratio.
3.13 P-Value
3.14 Phi-Coefficient
3.15 Cramer’s V –Value
3.16 Pearson’s Statistics and Chi-Square Distribution
  3.16.1 Likelihood Ratio Statistic
3.17 Preference of Logistic Regression analysis
3.18 Logistic Regression
  3.18.1 Reason to using logistic regression
  3.18.2 Fitting the logistic regression model
  3.18.3 Wald Test
  3.18.4 Score Test
3.19 The Multiple Logistic Regression Model
  3.19.1 Multivariate versions of Wald and Score Test
3.20 Explanation of logistic regression model
  3.20.1 Explanation of multivariate case
  3.20.2 Dichotomous Independent Variable
  3.20.3 Logistic regression and confidence interval
  3.20.4 Polytomous independent variable
3.21 Assessment of analyzing the model
3.22 Transformations on variables
3.23 Strategy of analysis
3.24 Limitations of collecting data
3.25 Coding of data

CHAPTER 4
RESULTS & DISCUSSION
4.1 Summary of the chapter 53
4.2 Descriptive Analysis for Overall sample 54
  4.2.1 Epidemiological Study of diabetes 59
    4.2.1.1 Discussion on Epidemiological Study 61
4.3 Analytic Section for Overall sample 62
  4.3.1 Univariate Analysis 62
  4.3.2 The Multiple Logistic Regression Model and C-I 63
  4.3.3 Multivariate version with interaction terms 66
  4.3.4 Goodness of fit for The Model 67
  4.3.5 Logit model for overall sample 69
4.4 City Wise Sample Analysis 69
  4.4.1 Interpretation of frequencies and cross tables 69
    4.4.1.1 Comparison of risk factors among different Cities 79
  4.4.2 Analytic Study for City wise Sample 82
    4.4.2.1 Univariate Analysis for City Wise Sample 82
    4.4.2.2 The Multiple Logistic Regression Model and C-I 83
    4.4.2.3 Effect of interaction terms in different cities 88
    4.4.2.4 City Wise goodness of fit for the Model 91
    4.4.2.5 City Wise Predicted Models 93
  4.4.3 Discriminant analysis 94
4.5 Transformations on predictor variables 96
4.6 Summary of Conclusions 98
4.7 Recommendations 101
4.8 Discussion on the title of dissertation 103
