Contents

1 Introduction **1**

1.1 Waves and Instabilities in Plasmas 3

1.2 Plasma Flows and Instabilities 5

1.3 Nonlinear Structures 7

1.3.1 Vortices 8

1.3.2 Solitons 12

1.4 Kappa Distribution Function 13

1.5 Layout of the Thesis 15

2 Current-Driven Electrostatic Waves in Heavier Ion Plasmas **17**

2.1 Theoretical Model 19

2.2 Linear Dispersion Relation 21

2.3 Dipolar Vortices 25

2.4 Solitons 27

2.5 Numerical Results 29

2.6 Discussion 30

3 Current-Driven Waves in Plasmas with Stationary Dust **33**

3.1 Model and Basic Equations 35

3.2 Dispersion Relation for Coupled Drift and Acoustic Modes 37

3.3 Nonlinear Analysis 39

3.3.1 Weak Shear Limit 39

3.3.2 Strong Shear Limit 42

3.4 Summary 44

4 Current-Driven Dust Waves **51**

4.1 Theoretical Model 52

4.2 Linear Analysis 54

4.3 Nonlinear Analysis 56

4.3.1 Vortex Solutions 56

4.3.2 Soliton Solutions 58

4.4 Applications 59

4.5 Summary 61

5 Drift Modes in Bounded Bi-ion Plasmas **66**

5.1 Basic Equations 68

5.2 Local Dispersion Relation 70

5.3 Global Drift Mode in a Cylinder 70

5.4 Effect of Magnetic Shear in Slab Geometry 72

5.5 Discussion 75

6 Summary and Conclusions **79**
