

### TABLE OF CONTENTS

NO	TITLE	PAGE
1	INTRODUCTION	01
2	REVIEW OF LITERATURE	13
3	MATERIALS AND METHODS	57
3.1	EPIDEMIOLOGY	57
3.1.1	Animals screening for <i>Sarcoptes scabiei</i>	57
3.1.1.1	Skin Scrapping in Camels	58

3.1.1.2	Skin scrapping in Dogs	58
3.1.1.3	Skin Scrapping in Buffalo-Calves	59
3.1.1.4	Skin Scrapping in Goats	59
3.1.1.5	Human Screening for Scabies Mite	59
3.1.16	Permanent mounting slide method	60
3.2	INDIGENOUS MEDICINAL PLANTS AND THEIR CLASSIFICATION	60
3.2.1	Collection and processing of medicinal plants	60
3.2.1.2	Preparation of the stock solutions	63
3.2.2	<i>Sarcoptes Scabiei</i> (Itch mite)	64
3.2.2.1	Rearing of <i>Sarcoptes scabiei</i> mites	64
3.2.2.2	Mites rearing and collection	64
3.2.2.3	Structure of cell for enclosing mite and food	65
3.3.3	BIOACTIVITY	66
3.3.3.1	Media preparation for <i>Sarcoptes scabiei</i>	66
3.3.3.2	Anti-scabies screening through <i>in Vitro</i> technique	66
3.3.3.3	Statistical analysis	67
3.4.4	HOUSE DUST MITES	67
3.4.4.1	Preparation of fish flake extract and <i>Nepeta cataria</i> essential oils	68
3.4.4.2	Y-tube olfactometer assay	68
3.4.4.3	The binomial model for the experiment	70
3.4.4.4	Statistical analysis	71
3.5.1	<i>In Vivo</i> Study of Scabies infested animals and human	71
3.5.1.1	Source of Animals	72
3.5.1.2	Groups of Animals and Drugs-	72
3.5.1.3	Anti-scabies screening of plant extracts using <i>in vivo</i> Technique	73
3.5.1.4	Statistical analysis	74
3.6.1	HAEMATOLOGICAL STUDY	74
3.6.1.1	Apparatus and Chemicals	75
3.6.1.2	Preparation of Materials	75
3.6.1.2	Collection of Blood	76
3.6.1.3	Total Leukocytic Count (TLC)	76
3.6.1.4	Differential Leukocytic Count (DLC)	77
3.6.1.5	Method of staining with Wright's Stain	77

3.6.1.6	Statistical analysis	78
3.7.1	ZOONOTIC STUDY	78
3.7.1.1	Zoonotic study of <i>Sarcoptes scabiei var canis</i>	78
3.7.1.2	Zoonotic study of <i>Sarcoptes scabiei var cameli</i>	79
3.7.1.3	Zoonotic study of <i>Sarcoptes scabiei var bubalis</i>	79
3.7.1.4	Zoonotic study of <i>Sarcoptes scabiei var caprae</i>	79
3.7.2	Experimental trials	80

## RESULTS

No	Title	Page
4.1.1	Identification of <i>Sarcoptes scabiei</i> and its load evaluation.	83
4.1.1.1	General characteristics of <i>Sarcoptes Scabiei</i> .	84
4.1.1.2	Sexual differentiation in the morphology of <i>Sarcoptes scabiei</i>	85
4.1.1.3	Morphological characteristics of <i>Sarcoptes Scabiei var. bubalis</i> .	87
4.1.1.4	Morphological characteristics of <i>Sarcoptes Scabiei var. cameli</i> .	87
4.1.1.5	Morphological characteristics of <i>Sarcoptes Scabiei var. canis</i> .	87
4.1.1.6	Morphological characteristics of <i>Sarcoptes Scabiei var. caprae</i> .	88
4.1.1.7	Morphological characteristics of <i>Sarcoptes Scabiei var. hominis</i>	88
4.1.2	Prevalence of <i>Sarcoptes scabiei</i>	89
4.1.2.1	Seasonal prevalence of <i>Sarcoptes scabiei</i>	89
4.1.2.2	Age and Sex wise prevalence of <i>Sarcoptes scabiei</i>	90
4.1.3.1	Zoonotic potential of <i>Sarcoptes scabiei</i> strains	94
4.1.4	Haematological affect of scabies on Animals and Humans	96
4.1.4.1	Affect of scabies on White blood cells of Animals and Humans	96
4.1.4.2	Affect of scabies on Red blood cells of Animals and Humans	98
4.1.4.3	Affect of scabies on Haemoglobin level of Animals and Humans	100
4.1.4.4	Affect of scabies on Haematocrat values of Animals and Humans	102
4.1.4.5	Affect of scabies on Mean Corpuscular volume of Animals and Humans	104
4.1.4.6	Affect of scabies on Mean Corpuscular haemoglobin of Animals and Humans	105
4.1.4.7	Affect of scabies on Mean corpuscular haemoglobin concentration of Animals and Humans.	107
4.1.4.8	Affect of scabies on Packed Cells Volume of Animals and Humans.	109

4.1.4.9	Affect of scabies on Eosinophil count of Animals and Human.	110
4.1.4.10	Affect of scabies on Lymphocytes count of Animals and Human.	112
4.1.5.1	Miticidal effect of <i>Azadirachta indica</i> ( <i>A.indica</i> ) plant extract.	113
4.1.5.2	Miticidal effect of <i>Caparis decidua</i> plant extracts.	116
4.1.5.3	Miticidal effect of <i>Melia azedarach</i> Linn plant extracts.	119
4.1.5.4	Miticidal effect of <i>Nicotiana tobacum</i> plant extracts.	121
4.1.5.5	Miticidal effect of <i>Techomella undulata</i> plant extracts.	124
4.1.5.6	Miticidal effect of <i>Vitex negundo</i> plant extracts.	127
4.1.6	Laboratory study.	130
4.1.6.1	Miticidal effect of medicinal plant extracts <i>in Vitro</i>	130
4.1.6.2	Toxicity of medicinal plants methanolic extracts against <i>Sarcoptes scabiei</i> mites in terms of lethal concentration (LC <sub>50</sub> ).	131
4.1.6.3	<i>Nepeta cataria</i> volatile oil effect against house dust mite	132

## DISCUSSION

No	Title	Page
5.1	Prevalence of <i>Sarcoptes scabiei</i>	135
5.2	Seasonal prevalence of <i>Sarcoptes scabiei</i>	141
5.3	Topographical distribution of Scabies lesions	141
5.4	Transmission and zoonotic efficiency of <i>Sarcoptes scabiei</i>	142
5.5	Haematological variations in affected and control Animals and Human	143
5.6	Scabies treatment failure and application of medicinal plants extracts on scabies lesions	145
5.6.1	Compatibility of <i>Azadirachta indica</i> with ivermectin versus control under <i>in vivo</i> trials	146
5.6.2	Compatibility of <i>Caparis decidua</i> with ivermectin versus control under <i>in vivo</i> trials	147
5.6.3	Compatibility of <i>Melia azedarach</i> with ivermectin versus control under <i>in vivo</i> trials	149
5.6.4	Compatibility of <i>Nicotiana tobacum</i> with versus control under <i>in vivo</i> trials	150
5.6.5	Compatibility of <i>Tecomella undulata</i> with ivermectin versus control under <i>in vivo</i> trials	151
5.6.6	Compatibility of <i>Vitex negundo</i> with ivermectin versus control under <i>in vivo</i> trials	153
5.7	Miticidal effect of different medicinal plants extracts under in vitro laboratory study against <i>Sarcoptes scabiei</i> mites	154
5.8	Behavioral response of <i>Nepeta cataria</i> volatile oils (Nepetolactones) under <i>in vitro</i> Laboratory study against <i>Dermatophagoides</i> .	160
6.0.0.0	Summary	163
