List of Tables	xiv
List of Figures.....	xix
List of Abbreviations.....	xxviii
CHAPTER 1: INTRODUCTION	1
CHAPTER 2: REVIEW OF LITERATURE.....	5
2.1. Drought and plant growth.....	1
2.1.1. Effects of drought stress on plant photosynthesis.....	7
2.1.2. Effect of drought on root respiration.....	8
2.1.3. Osmotic adjustment in plants under drought.....	8
2.2. Maize: An Introduction	10
2.2.1. History.....	10
2.2.2. Growth habit and morphology.....	11
2.2.3. Geography of maize cultivation	11
2.3. Effect of drought on maize.....	12
2.3.1. Influence of drought on the phenology of maize.....	12
2.3.2. Effect of drought on anthesis to silking interval (ASI).....	14
2.3.3. Disruption in reproductive stage under water deficit.....	14
2.3.4. Effect of drought on relative water contents of maize.....	15
2.3.5. Effect of drought on root traits.....	15
2.3.6. Effect of drought on yield and yield related components.....	15
2.4. Need for the drought tolerance	17
2.5. Silicon: An introduction.....	18
2.5.1. Silicon deposition in plant tissues.....	18
2.5.2. Silicon role in plant biology.....	21
2.5.3. Effect of silicon on tissue strength.....	22
2.5.4. Role of silicon in plant physiology.....	22
2.5.4.1. Effect of silicon on gas exchange in plants.....	22
2.5.4.1.1 Effect of silicon on photosynthesis.....	22
2.5.4.1.2 Influence of silicon on transpiration.....	23
2.5.4.1.3 Influence of silicon on stomatal conductance.....	24
2.5.4.2 Effect of silicon on water relation.....	24

2.5.4.2.1	Influence of silicon nutrition on water potential...	24
2.5.4.2.2	Role of silicon in osmotic adjustment.....	25
2.5.4.2.3	Effect of silicon fertilization on relative water content.....	25
2.5.4.3	Role of silicon against oxidative stress.....	25
2.5.5	Effect of silicon on growth of plants.....	26
2.5.6	Effect of silicon on yield.....	27
2.6.	Silicon role against stresses.....	27
2.6.1	Alleviation of biotic stresses.....	28
2.6.2	Alleviation of abiotic stresses.....	29
2.6.2.1	Drought stress physiology and silicon.....	31
2.7.	Silicon and maize.....	33
CHAPTER 3: MATERIAL AND METHODS.....		34
3.1.	Experimental site geography	34
3.2.	Meteorological information	34
3.3.	Soil analysis	34
3.4.	Seed material collection	34
3.5.	Determination of field capacity	36
3.6.	Experiment 1: Screening of various maize hybrids for drought tolerance.....	37
3.6.1.	Crop husbandry	38
3.6.2.	Observations recorded.....	38
3.7.	Experiment 2: Optimization of various silicon levels for drought tolerance in maize hybrids.....	41
3.7.1.	Crop husbandry.....	41
3.7.2.	Observation recorded.....	42
3.7.2.1.	Silicon determination.....	42
3.8.	Experiment 3: Improvement in drought stressed maize hybrids by exogenous application of silicon.....	43
3.8.1.	Crop husbandry.....	43
3.8.2.	Observations recorded.....	44
3.9.	Experiment 4: Response of drought stressed maize hybrids to silicon application under field condition.....	45
3.9.1.	Observation recorded.....	47

3.10. Statistical analysis.....	49
CHAPTER 4: RESULTS AND DISCUSSION.....	50
4.1. Experiment 1: Screening of various maize hybrids for drought tolerance.....	50
4.1.1. Results.....	50
4.1.1.1 Leaf length.....	50
4.1.1.2. Stem diameter.....	50
4.1.1.3. Number of leaves per plant.....	51
4.1.1.4. Shoot fresh weight.....	52
4.1.1.5. Root fresh weight.....	53
4.1.1.6. Total fresh weight.....	53
4.1.1.7. Shoot dry weight.....	53
4.1.1.8. Root dry weight.....	54
4.1.1.9. Total dry weight.....	55
4.1.1.10. Root to shoot ratio.....	56
4.1.1.11. Leaf area per plant.....	56
4.1.1.12. Shoot length.....	57
4.1.1.13. Primary root length.....	58
4.1.1.14. Leaf water potential.....	59
4.1.1.15. Leaf osmotic potential.....	59
4.1.1.16. Leaf turgor potential.....	60
4.1.1.17. Relative water content.....	61
4.1.1.18. Photosynthetic rate.....	62
4.1.1.19. Transpiration rate.....	63
4.1.1.20. Stomatal conductance.....	64
4.1.2. Discussion.....	64
4.2. Experiment 2: Optimization of various silicon levels for drought tolerance in maize hybrids.....	71
4.2.1. Results.....	71
4.2.1.1 Plant height.....	71
4.2.1.2 Leaf length.....	71
4.2.1.3 Stem diameter.....	72
4.2.1.4 Number of leaves per plant.....	72

4.2.1.5 Leaf area per plant.....	73
4.2.1.6 Shoot fresh weight.....	74
4.2.1.7 Shoot dry weight.....	74
4.2.1.8 Root fresh weight.....	75
4.2.1.9 Root dry weight.....	76
4.2.1.10 Plant fresh weight.....	76
4.2.1.11 Plant dry weight.....	77
4.2.1.12 Primary root length.....	78
4.2.1.13 Root to shoot ratio.....	78
4.2.1.14 Leaf water potential.....	79
4.2.1.15 Leaf osmotic potential.....	80
4.2.1.16 Leaf turgor potential	81
4.2.1.17 Relative water content.....	82
4.2.1.18 Photosynthetic rate.....	83
4.2.1.19 Transpiration rate.....	84
4.2.1.20 Shoot silicon content.....	85
4.2.1.21 Root silicon content.....	87
4.2.2. Discussion.....	87

4.3. Experiment 3: Improvement in drought stressed maize hybrids by exogenous application of silicon.....93

4.3.1. Results.....	93
4.3.1.1. Plant height.....	93
4.3.1.2. Number of leaves per plant.....	93
4.3.1.3. Stem diameter	94
4.3.1.4. Leaf area per plant	95
4.3.1.5. Number of cobs per plant.....	95
4.3.1.6. Cob length	96
4.3.1.7. Cob diameter	96
4.3.1.8. Grain rows per cob.....	97
4.3.1.9. Number of grains per cob.....	97
4.3.1.10. 100-grain weight	98
4.3.1.11. Grain weight per cob	98
4.3.1.12. Biological yield per plant.....	99

4.3.1.13. Grain yield per plant	100
4.3.1.14. Harvest index (H.I).....	100
4.3.1.15. Photosynthetic rate	101
4.3.1.16. Transpiration rate	102
4.3.1.17. Relative water content.....	103
4.3.1.18. Leaf water potential	104
4.3.1.19. Leaf osmotic potential	105
4.3.1.20. Leaf turgor potential.....	106
4.3.1.21. Shoot and root silicon content.....	107
4.3.2. Discussion.....	108
4.4. Experiment 4: Response of drought stressed maize hybrids to silicon application	
under field condition.....	113
4.4.1. Results spring crop.....	113
4.4.1.1. Plant height	113
4.4.1.2. Number of leaves per plant.....	113
4.4.1.3. Leaf area index	114
4.4.1.4. Stem diameter	114
4.4.1.5. Days to 50% tasseling.....	115
4.4.1.6. Days to 50% silking.....	116
4.4.1.7. Number of cobs per plant.....	117
4.4.1.8. Cob length	117
4.4.1.9. Cob diameter	117
4.4.1.10. Number of grain rows per cob.....	118
4.4.1.11. Number of grains per cob.....	118
4.4.1.12. 100-grain weight	119
4.4.1.13. Grain weight per cob	120
4.4.1.14. Biological yield	121
4.4.1.15. Grain yield	121
4.4.1.16. Harvest index (H.I).....	122
4.4.1.17. Gas exchange attributes	123
4.4.1.18. Water relation parameters	126
4.4.1.19. Shoot and root silicon content.....	130
4.4.2. Results autumn crop.....	132

4.4.2.1. Plant height	132
4.4.2.2. Number of leaves per plant.....	132
4.4.2.3. Leaf area index	133
4.4.2.4. Stem diameter	134
4.4.2.5. Days to 50% tasseling and silking.....	134
4.4.2.6. Number of cobs per plant.....	135
4.4.2.7. Cob length	135
4.4.2.8. Cob diameter	136
4.4.2.9. Grain rows per cob.....	136
4.4.2.10. Number of grains per cob.....	137
4.4.2.11. 100-grain weight	138
4.4.2.12. Grain weight per cob	139
4.4.2.13. Biological yield	139
4.4.2.14. Grain yield	140
4.4.2.15. Harvest index (H.I).....	141
4.4.2.16. Gas exchange parameters	141
4.4.2.17. Water relation parameters	143
4.4.2.18. Shoot and root silicon content.....	148
4.4.3. Discussion.....	150
4.4.4. General discussion.....	156
CHAPTER 5: SUMMARY.....	159
Conclusions.....	162
Future research perspectives.....	163
LITERATURE CITED.....	164
APPENDICES.....	191
