Table of Contents

CHAPTER 1
Introduction 1
  1.1 Problem statement 1
  1.2 Description 1
Reference 4

CHAPTER 2
Face detection and Head Gesture Recognition 6
  2.1 Introduction to Face Detection 6
  2.2 Research challenges in Face Detection 6
    2.2.1 Benchmark Face Databases 6
  2.3 Proposed Methodologies 7
    2.3.1 AdaBoost based method 9
    2.3.2 Feature Selection for AdaBoost 9
  2.4 Introduction to Gesture Recognition 10
  2.5 Architecture of Gesture Recognition System 12
    2.5.1 Gesture Acquisition 13
    2.5.2 Geometric Features 14
      2.5.2.1 Geometric Features 14
      2.5.2.2 Motion Energy Images 15
    2.5.3 Gesture Recognition 15
      2.5.3.1 Hidden Markov Model (HMM) 16
      2.5.3.2 Time delay neural network 16

viii
CHAPTER 5
Experimental Setup and Results 44
5.1 Development Environment & Results 44
5.2 Results 45
Reference 47

CHAPTER 6
Novel Augmented Reality Applications by Eye Gaze and Head Gesture 48
6.1 Introduction 48
6.2 Augmented Reality Application for Automotive 48
   6.2.1 Background 48
   6.2.2 Existing Examples 49
   6.2.3 Forecasted vehicle road occupancy Assistance by Augmented Reality 50
   6.2.4 Animation of Road Area 51
   6.2.5 Drawbacks 52
   6.2.6 Animation of Wind Screen 52
6.3 Proposed Architecture 52
References 54

CHAPTER 7
Conclusion and Future Work 55
7.1 Conclusion 55
7.2 Future Work 56
