Table of Contents	v
Abstract	viii
Acknowledgements	ix
Introduction	1
0.1 Objectives of the Dissertation	1
0.2 Dissertation Organization	3
1 Preliminaries and Fundamental Concepts	5
1.1 Convex Functions and Related Results	5
1.2 Lagrange and Cauchy-type Mean Value Theorems	10
1.3 n-Exponentially Convex Functions	12
1.3.1 Examples	14
2 On the Refinements of the Jensen-Steffensen Inequality	15
2.1 Introduction	15
2.2 Refinement of the Jensen-Steffensen Inequality	17
2.3 Integral Analogous	18
2.4 Mean Value Theorems	23

2.5	n -Exponential Convexity and Log-convexity of the Jensen-Steffensen Differences	25
2.6	Examples	29
3	Refinements of the Lower Bounds of the Jensen's Functional	32
3.1	Introduction	32
3.2	Main Results	35
3.3	Some Special Cases	42
4	On the Refinements of Jensen, Slater, Majorization, Favard and Berwald Inequalities	46
4.1	Refinements of Some Companion Inequalities to the Jensen's Inequality	46
4.2	Refinements of the Majorization-type Inequality, Favard and Berwald Inequalities	51
4.3	Inequalities in Terms of Gâteaux Derivatives for Convex Functions in Linear Spaces	65
4.3.1	Inequalities for Convex Functions	67
4.3.2	Refinement of Jensen's Inequality	69
5	Generalizations and Improvements of an Inequality of Hardy-Littlewood-Pólya	73
5.1	Introduction and Preliminaries	73
5.2	Convex Functions and Generalizations of an Inequality of Hardy-Littlewood-Pólya	77
5.2.1	Mean Value Theorems	84
5.2.2	n -Exponential Convexity and Log-Convexity of the Functions Related to the Differences of the Generalized Inequalities . . .	85

5.2.3	Examples	86
5.3	3-Convex Functions and Generalizations of an Inequality of Hardy- Littlewood-Pólya	90
5.3.1	Mean Value Theorems	96
5.3.2	n -Exponential Convexity and Log-Convexity of the Functions Related to the Differences of the Generalized Inequalities . . .	99
5.3.3	Examples	101
	Bibliography	108
