TABLE OF CONTENTS

List of figures........................................................................................................xvi
List of tables..........................................................................................................xviii
List of abbreviations.............................................................................................xx
List of publications...............................................................................................xxii

Chapter one  

<table>
<thead>
<tr>
<th>Introduction</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Introduction</td>
<td>1</td>
</tr>
<tr>
<td>1.2 Objective</td>
<td>2</td>
</tr>
<tr>
<td>1.3 Thesis organization</td>
<td>3</td>
</tr>
</tbody>
</table>

Chapter two  

<table>
<thead>
<tr>
<th>Background and literatures review</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Radon daughters</td>
<td>4</td>
</tr>
<tr>
<td>2.2 Radon and risk</td>
<td>5</td>
</tr>
<tr>
<td>2.2.1 The life cancer estimate</td>
<td>6</td>
</tr>
<tr>
<td>2.2.2 Excess of Lung Cancer Risk</td>
<td>7</td>
</tr>
<tr>
<td>2.2.3 Radon in water</td>
<td>8</td>
</tr>
<tr>
<td>2.2.4 Health risks due to waterborne radon</td>
<td>9</td>
</tr>
<tr>
<td>2.3 Soil gas radon</td>
<td>10</td>
</tr>
<tr>
<td>2.4 Indoor radon sources</td>
<td>11</td>
</tr>
<tr>
<td>2.5 Literature review</td>
<td>12</td>
</tr>
<tr>
<td>2.5.1 Radon concentration in water</td>
<td>12</td>
</tr>
<tr>
<td>2.5.2 Soil gas radon concentrations</td>
<td>14</td>
</tr>
<tr>
<td>2.5.3 Indoor radon concentrations</td>
<td>16</td>
</tr>
</tbody>
</table>

Chapter Three  

<table>
<thead>
<tr>
<th>Geology and demography of the study area</th>
<th>21</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Landform of Hazara division</td>
<td>22</td>
</tr>
<tr>
<td>3.2 Abbottabad</td>
<td>23</td>
</tr>
<tr>
<td>3.2.1 Physical feature and topography</td>
<td>23</td>
</tr>
<tr>
<td>3.2.2 Geology</td>
<td>23</td>
</tr>
</tbody>
</table>
Chapter Four  
Measurement techniques  

4.1 Passive techniques. .............................................. 37
   4.1.1 Charcoal canister technique. .......................... 38
   4.1.2 Electrics. ................................................. 38
4.1.3 Thermoluminescent technique. ..........................................38
4.1.4 Etched tracks detectors. ................................................39
  4.1.4.1 Membrane permeation samplers. .........................39
  4.1.4.2 Plastic bag permeation samplers. .......................39
  4.1.4.3 NRPB radon dosimeter. .................................40
4.2 Active techniques. ..........................................................40
  4.2.1 Lucas cell (scintillation method). .........................41
  4.2.2 Ionization chamber. ..................................................41
  4.2.3 Surface barrier detector (SBD). ..............................41
  4.2.4 Two filter method. ...................................................41
  4.2.5 Working level method. .............................................42

Chapter five  Experimental  46
5.1 Radon level in water. .................................................46
  5.1.1 Sampling. ...............................................................46
5.2 Soil gas radon...............................................................52
  5.2.1 Sampling. ...............................................................52
5.3 Indoor radon concentrations..........................................53
  5.3.1 Sampling. ...............................................................54

Chapter six  Results and discussions  57
6.1 Radon concentration in water sources. .........................57
  6.1.1 Dose calculation from radon concentrations in water........68
6.2 Soil gas radon concentrations........................................70
6.3 Results of the indoor radon concentrations......................71
  6.3.1 Seasonal correction factor........................................73
  6.3.2 Comparative study of yearly measured indoor radon and seasonal averaged indoor radon........................................73
  6.3.3 Variation of indoor radon concentrations in different stories and construction materials........................................74
  6.3.4 Dose estimation from indoor radon concentration..........75
6.3.5 The excess of lung cancer in the study area………………….75

*Chapter seven*  
**Conclusions and future recommendations**  
91

7.1 Conclusions. ………………………………………………………91
7.2 Future recommendations…………………………………………94
7.3 References. ………………………………………………………95
