

TABLE OF CONTENTS

1. Introduction	1
2. Preliminaries	11
2.1 Continuity equation	12
2.2 Momentum equation for Newtonian fluid	12
2.3 Energy equation in 2-Dimension.....	13
2.4 Boundary layer approximation.....	14
2.4.1 Viscous boundary layer equation	14
2.4.2 Thermal boundary layer equation.....	16
2.5 Maxwell fluid	17
2.6 Casson fluid.....	18
2.7 Nanofluid.....	19
2.8 Some basic mechanism of fluid flow and heat transfer.....	20
2.8.1 Forced, free and mixed convection	20
2.8.2 Internal heat generation.....	20
2.9 Definition of some dimensionless parameters	20
2.9.1 Reynolds number.....	21
2.9.2 Prandtl number	21
2.9.3 Skin friction coefficient	21
2.9.4 Nusselt number	22
2.9.5 Sherwood Number	22
2.9.6 Mixed convection parameter.....	23
3. Mixed Convection Flow over an Unsteady Stretching Surface in a Porous Medium with Heat Source....	24
3.1 Mathematical formulation.....	25

3.2	Solution of problem	28
3.2.1	Numerical solution.....	28
3.2.2	Perturbation solution for small parameter α^*	28
3.3	Results and discussion	30
3.4	Conclusions	31
4.	Flow of Casson Fluid over a Shrinking Sheet with Heat Transfer.....	38
4.1	Mathematical analysis.....	39
4.2	Discussion	41
4.3	Conclusions	43
5.	Unsteady Mixed Convection Flow of Upper Convected Maxwell Fluid over a Stretching Surface with Heat Transfer and Porous Medium.....	49
5.1	Solution methods for the problem	52
5.1.1	Exact solution	52
5.1.2	Perturbation solution for small ξ	54
5.1.3	Local non-similarity (LNS) method	55
5.1.4	Implicit finite difference method (IFDM)	56
5.2	Results and discussion	58
5.3	Conclusions	59
6.	MHD Mixed Convection Stagnation Point Flow and Heat Transfer towards an Exponentially Stretching Sheet	65
6.1	Mathematical analysis of the problem.....	66
6.2	Solution methodologies	67
6.2.1	Implicit finite difference method (IFDM)	67

6.3	Results and discussion	70
6.4	Conclusions	72
7.	Unsteady Mixed Convection Stagnation Point Flow over an exponentially stretching surface.....	78
7.1	Problem formulation	79
7.2	Solution procedures	81
7.2.1	Perturbation solutions for small time ($\tau \ll 1$)	82
7.2.2	Asymptotic solutions for large time τ	84
7.3	Discussion	85
7.4	Conclusions	87
8.	Boundary Layer Flow and Heat Transfer of Viscous Nanofluid over an Exponentially Stretching Surface..	93
8.1	Problem formulation	94
8.2	Results and discussion	96
8.3	Concluding remarks.....	97
9.	Conclusions.....	102
10.	References.....	105
