LIST OF FIGURES XIII

NOMENCLATURE XV

INTRODUCTION 1

1.1 Power quality 1

1.2 Distributed generation 3

1.3 Islanding Phenomena 4

1.4 Micro Grid Operation 5

1.5 Problem Statement 6

1.6 Scope of study 7

1.7 Objective 9

POWER QUALITY 11

2.1 Introduction 11

2.2 Objectives of Power Quality 12

2.3 Causes of Power Quality Deformation 13

2.3.1 Capacitor Switching 13

2.3.2 Momentary Fault 14

2.4 Long Duration Voltage Variations 14

2.5 Short term Voltage Variations 16

2.6 Power Quality Indices 17

2.6.1 Interruption 18

2.6.2 Transients 20

2.6.3 Voltage Sag 22

2.6.4 Voltage Swell 24

2.6.5 Waveform Distortion 25

2.7 Voltage Fluctuations 31
4.6 Islanding Detection Techniques

4.7 Passive Islanding Detection Techniques
4.7.1 Voltage Based Islanding Detection Techniques
4.7.2 Frequency Based Islanding Detection Techniques
4.7.3 Rate of Change of Frequency (ROCOF)
4.7.4 Vector Shift
4.7.5 Phase Jump Detection (PJD)
4.7.6 Voltage Harmonic Detection

4.8 Active Islanding Detection Techniques
4.8.1 Output Power Variation
4.8.2 Impedance Measurement
4.8.3 Sliding Mode Frequency Shift (SMFS)
4.8.4 Active Frequency Drifts (AFD)

4.9 Other Methods
4.9.1 Reactance Insertion
4.9.3 Supervisory Control and Data Acquisition (SCADA)
4.9.4 Phase Measurement Units
4.9.5 Comparison of Rate of Change of Frequency (COROCOF)
4.9.6 Transfer Tripping Scheme

4.10 Review of existing Islanding Detection Techniques

4.11 Summery

ALGORITHMS AND SIMULATION RESULTS

5.1 Introduction

5.2 DG for Performance Enhancement of Distribution Feeder

5.3 Voltage Profile Improvement (EPI) Of Distribution Feeder

5.4 Effect of Voltage Profile Improvement on Feeder Performance

5.5 Distribution Feeder Performance Enhancement Analyses by IDG Algorithm
5.5.1 Power Loss and Voltage Drop without DG
5.5.2 Power Loss and Voltage Drop with DG
5.5.3 Optimal Placement of DG
5.5.4 Implementation of IDG Algorithm
5.5.5 Salient Features of the IDG Tool

5.6 Case Study 1
5.6.1 Step 1
5.6.2 Step 2
5.6.3 Step 3

5.7 Case study 2
5.7.1 Step 1
5.7.2 Step 2
