## Chapter 1

### Introduction

1.1	The Primer	5
1.2	Plasma	5
1.2.1	Debye Shielding	6
1.2.2	Homogeneous and Inhomogeneous Plasma	8
1.2.3	Different approaches to treat the Plasmas	8
1.2.4	The technique of Fourier transformation	10
1.2.5	Conducting behavior of Plasma	10
1.2.6	The dielectric response tensor	11
1.3	Dense Quantum Plasmas	11
1.3.1	Properties of the Quantum plasmas	12
1.3.2	Tackling Quantum Plasmas	14
1.4	Complex Plasmas	15
1.4.1	Properties of the Complex Plasmas	16
1.4.2	Applications of Complex Plasmas	17
1.4.3	Modes in Complex Plasmas	18
1.5	Electrostatic Potential	20
	Review of thesis	23

## Chapter 2

### Modified screening potential in a high density inhomogeneous quantum dusty magnetoplasma

2.1	Introduction	26
2.2	Dielectric Response Function	28
2.3	Modified Screening Potential	30
2.4	Numerical and graphical representations	32
	Figure captions	38

## Chapter 3

### Potentials in a nonuniform quantum dusty magnetoplasma

3.1	Introduction	40
3.2	Quantum Dielectric Response Function	41
3.3	Modified SNS and wake potentials	42
3.4	Numerical results and graphical representations	46
	Figure captions	52

## Chapter 4

### Dust-lower-hybrid waves in quantum plasmas

4.1	Introduction	54
4.2	Modified dust-lower-hybrid wave	55
4.3	Numerical analysis and Discussion	57
	Figure captions	62

## Chapter 5

### Summary of the Thesis

5.1	Summary and Conclusions	64
•	References	68
