Abstract.....	3

## 1. INTRODUCTION

Introduction.....	5
1.1 Protein.....	6
1.1.1 Plant Protein.....	7
1.2 Plant Anatomy.....	7
1.2.1 Plants Tissues.....	7
1.3 Staining Dyes: Coomassie and Lawsone Dye.....	9
1.3.1 Coomassie Dye.....	9
1.3.1.1 Chemical Reaction of Protein with Coomassie Dye.....	10
1.3.2 Lawsone dye from Henna.....	10
1.3.2.1 Henna Composition .....	10
1.3.2.2 Chemistry of Lawsone Dye .....	11
1.3.2.3 Chemical Reaction of Lawsone Dye with Protein.....	12
1.4 Microscope, Camera and Computer.....	12
1.4.1 Overview.....	12
1.4.2 Microscope.....	13
1.4.2.1 Microscopic Camera.....	13
1.4.3 Computer.....	13
1.4.3.1 Computer Hardware.....	14
1.4.3.2 Computer Software.....	14
1.4.3.3 Computer Languages.....	14
1.4.4 Stepper Motor .....	15
1.4.4.1 Types of Stepper Motors.....	15
1.4.4.2 Interface of Stepper motors with Computer.....	15
1.4.5 Image Processing.....	15
1.4.5.1 Colour Intensity.....	16

## 2. Literature Review

Literature Review.....	17
------------------------	----

## 3. Experimental

3.1. Material.....	20
3. 2. Methodology.....	26
3.2.1 Protein Analysis by Spectrophotometric method.....	26
3.2.1.1 Collection of Siris samples.....	26
3.2.1.2 Collection of Pea and Gram.....	26
3.2.1.3 Preparation of Reagents/Chemicals.....	26
3.2.1.4 Extraction of Protein.....	27
3.2.1.5 Procedure for Lowry's Method.....	27
3.2.1.6 Procedure for Bradford Method.....	27
3.2.2 Determination of Molecular Weight of Protein by Electrophoresis.....	28
3.2.2.1 Preparation of Solution.....	28
3.2.2.2 Procedure for Electrophoresis.....	29
3.2.3 Lawsone Dye from Leaves of Henna ( <i>Lawsonia inermis</i> ).....	30
3.2.3.1 Collection of Henna Leaves.....	30
3.2.3.2 Preparation of Henna Powdered Leaves Sample.....	30
3.2.3.3 Preparation of Lawsone Dye Extraction from Henna Leaves.....	30
3.2.3.4 Determination of pH and Optical Absorption of both Extraction.....	30
3.2.4 Paper Chromatography for Protein.....	31
3.2.4.1 Extraction of Protein.....	31
3.2.4.2 Preparation of Spray Solution.....	31
3.2.4.3 Selection of Suitable pH for Staining through Paper Chromatography.....	31
3.2.5 Computer Hardware and its Software.....	32
3.2.6 Staining Colour Intensity Based Method (ABSA).....	34
3.2.6.1 Requirements for the Measurement of Colour Intensities of 2D Images.....	34
3.2.6.2.1 ABAS Software.....	34
3.2.6.2.2 Description of ABAS Software.....	35
3.2.6.3 Determination of Staining Colour Intensity of 2D Images (Plant Sections).....	42

3.2.7 Staining of Plants Section.....	42
3.2.7.a Preparation of Sections for Microscope.....	42
3.2.7.b. Dyes for Plant Sections Staining .....	42
3.2.7.1 Staining of three Plant Sections by Coomassie Brilliant Blue (CBB Dye).....	43
3.2.7.1.1 Preparation of CBB Dye.....	43
3.2.7.1.2 Staining of C.S of Siris with CBB Dye.....	43
3.2.7.1.3 Staining of C.S of Pea (P-1, P-2 & P-3) with CBB Dye.....	43
3.2.7.1.4 Staining of C.S of Gram (G-1, G-2 & G-3) with CBB Dye.....	43
3.2.7.2 Staining of three Plant Sections with Pure Lawsone Dye (Ls Dye).....	44
3.2.7.2.1 Preparation of Ls Dye.....	44
3.2.7.2.2 Staining of C.S of Siris in 2% Ls dye at Different Temperatures.....	44
3.2.7.2.3 Staining of C.S of Siris with Ls dye.....	44
3.2.7.2.4 Staining of C.S of Pea (P-1, P-2 & P-3) with Ls Dye.....	44
3.2.7.2.5 Staining of C.S of Gram (G-1, G-2 & G-3) with Ls Dye.....	44
3.2.7.3 Lawsone Dye: Extracted from Henna Powdered Leaves Extraction for One Hour (Hple1) .....	45
3.2.7.3.1 Preparation of Hple1.....	45
3.2.7.3.2 Staining of C.S of Siris with Hple1 at Different Temperatures.....	45
3.2.7.3.3 Staining of C.S of Siris with Hple1.....	45
3.2.7.3.4 Staining of C.S of Pea (P-1, P-2 & P-3) with Hple1.....	46
3.2.7.3.5 Staining of C.S of Gram (G-1, G-2 & G-3) with Hple1.....	46

## **4. Result and Discussion**

4. Results and Discussion.....	47
4.1 Protein Analyzed by Spectrophotometric Methods.....	48
4.1.1 Protein from Siris.....	48
4.1.2 Protein from Three Stem Growth Stages of Pea (P-1, P-2 & P-3).....	49
4.1.3 Protein from Three Stem Growth Stages of Gram (G-1, G-2 & G-3).....	51
4.2 Molecular Weight of Protein by Electrophoresis.....	53
4.2.1 Protein from Siris.....	53
4.2.2 Protein from Three Stem Growth Stages of Pea (P-1, P-2 & P-3).....	55
4.2.3 Protein from Three Stem Growth Stages of Gram (G-1, G-2 & G-3).....	57
4.3 Extraction of Lawsone Dye from Leaves of Henna.....	59

4.4 Paper Chromatography.....	78
4.5 Computer Hardware (Stepper Motors).....	81
4.6 ABAS Computer Software .....	82
4.6.1.1 Staining of Anatomical Sections with CBB Dye.....	82
4.6.1.2 Staining of Anatomical Sections with Ls Dye and Hple1.....	83
4.6.1.3 Computer Software Assessment of Anatomical Sections of plants.....	83
4.6.2.1 ABAS Computer Software Assessment of Anatomical Sections of Siris.....	94
4.6.2.2 ABAS Computer Software Assessment of Three Stem Growth Stages of Pea (P-1, P-2 & P-3) with different Dyes.....	108
4.6.2.3 ABAS Computer Software Assessment of Three Stem Growth of Gram (G-1, G-2 & G-3) with Different Dyes.....	120
<b>5. Conclusion and future suggestions.....</b>	<b>134</b>
<b>Appendix.....</b>	<b>136</b>
<b>Reference.....</b>	<b>151</b>
