

CONTENTS

CHAPTER 1: INTRODUCTION

1.1	Statement of the Problem.....	1
1.2	Literature Survey	5
1.3	Brief Description of the Method of Solution	15

CHAPTER 2: FUNDAMENTAL EQUATIONS OF COMPRESSIBLE FLUID FLOW

2.1	Introduction.....	17
2.2	Equation of Continuity for a Compressible Fluid.....	17
2.3	Stress – Strain Rate Relationship for a Newtonian Fluid	18
2.4	Navier – Stokes’ Equations of Motion for a Compressible Viscous Fluid.....	19
2.5	The Energy Equation	21
2.8	Equation of State for a Perfect Gas.....	23

CHAPTER 3: MATHEMATICAL FORMULATION OF THE EQUATION FOR INVISCID COMPRESSIBLE FLOW

3.1	Introduction.....	24
3.2	Concepts of Thermodynamics	24

3.3	Ratio of Specific Heats	25
3.4	Specific Entropy.....	26
3.5	Compression and Expansion of Gases	26
3.6	Types of Processes.....	27
3.7	General Relationships Between Pressure , Specific Volume , and Temperature ..	29
	3.7.1 Relationships For Isentropic Process	30
3.8	Bernoulli's Equations for Steady Inviscid Flow	31
3.9	Energy Equation.....	32
3.10	Velocity of Sound	33
3.11	Mach Number	33
3.12	Types of Compressible Flows.....	34
3.13	Isentropic and Non – Isentropic Inviscid Compressible Flows	35
3.14	Irrotational Isentropic Flow	35
3.15	Mathematical Formulation of the Equation for Irrotational Isentropic Flow	39

CHAPTER 4: MATHEMATICAL FORMULATION OF THE EQUATIONS FOR BOUNDARY ELEMENT METHODS

4.1	Introduction.....	43
4.2	Mathematical Formulation of the Equation for the Direct Boundary Element Method	44

4.3	Mathematical Formulation of the Equation for the Indirect Method.....	54
-----	---	----

CHAPTER 5: MATRIX FORMULATION OF THE BOUNDARY

INTEGRAL EQUATION

5.1	Introduction.....	59
5.2	Types of Boundary Elements.....	59
5.3	Matrix Formulation for the Direct Boundary Element Method.....	62
5.4	Matrix Formulation for Indirect Boundary Element Method Equation.....	69
5.6	Evaluation of Integrals.....	70
5.7	Analytical Evaluation of Coefficient of Integrals for Two-Dimensional Case	72
5.8	Solution of the System of Equations.....	102

CHAPTER 6: BOUNDARY ELEMENT METHODS APPLIED TO

POTENTIAL FLOW PROBLEMS

6.1	Introduction.....	103
6.2	Unbounded Flow Field Calculations	105
6.2.1	Flow Past a Prolate Spheroid.....	105
6.2.2	Flow Past an Oblate Spheroid.....	120
6.3	Mathematical Modeling of a Wake.....	129
6.3.1	Streaming Motion Past a Rankine Half – Body.....	138

CHAPTER 7: BOUNDARY ELEMENT METHODS FOR COMPRESSIBLE FLUID FLOW PROBLEMS

7.1	Introduction.....	148
7.2	Theory of Aerofoils.....	148
7.3	Symmetric Aerofoil	149
7.4	Unbounded Flow Field Calculations Using Boundary Element Methods.....	150
	7.4.1 Flow Past a Symmetric Aerofoil.....	150
	7.4.2 Exact Velocity.....	151
	7.4.3 Boundary Conditions	153
	7.4.4 Process of Discretization.....	155
7.5	Direct Boundary Element Method for Constant Element Approach.....	156
7.6	Matrix Formulation for Direct Constant Boundary Element Approach.....	157
7.7	Direct Boundary Element Method for Linear Element Approach.....	164
7.8	Indirect Boundary Element Method.....	172
	7.8.1 Indirect Constant Element Approach.....	172
	7.8.2 Matrix Formulation.....	173
7.9	Indirect Boundary Element Method for Linear Element Approach	180
7.10	Joukowski's Aerofoil.....	188
7.11	Flow Past a Joukowski Aerofoil.....	188

7.11.1	Exact Velocity.....	189
7.11.2	Boundary Conditions	192
7.11.3	Process of Discretization.....	193
7.11.4	Direct Boundary Element Method For Constant Element Approach	194
7.11.5	Direct Boundary Element Method for Linear Element Approach.....	201
7.12	Indirect Boundary Element Method.....	209
7.12.1	Constant Boundary Element Approach	209
7.12.2	Indirect Boundary Element Method For Linear Element Approach	217
	Conclusions and Suggestions for Future Work	225
	References.....	227
	List of Research Papers Published and Accepted for Publications from Thesis	239
