Contents	v
Acknowledgements	vii
Introduction	1
1 Preliminaries	4
1.1 Complexes and Limits	4
1.2 Čech Complex	7
1.3 Section Functor and Local Cohomology	9
1.4 Grade and Canonical Modules	17
2 A Few Comments on Duality Theorems and Flat Covers	19
2.1 Matlis Duality	19
2.2 More General Local Duality	22
2.3 Flat Covers	29
3 The Truncation Complex and Natural Homomorphisms	31
3.1 The Truncation Complex	31
3.2 Natural Homomorphisms	35
4 On Cohomologically Complete Intersections in Cohen-Macaulay Rings	44
4.1 Arithmetic Rank and Cohomological Dimension	44

4.2	Necessary Condition of $H_I^i(M) = 0$, for all $i \neq c$	47
4.3	Converse(Sufficient Condition of $H_I^i(M) = 0$, for all $i \neq c$)	50
5	On Invariants and Endomorphism Rings of Certain Local Cohomology Modules	58
5.1	The Endomorphism Ring	59
5.2	On the τ -numbers	69
5.3	Problems and Perspectives	71
	Bibliography	72
