**CHAPTER 3** .................................................................. 59

**DATA AND METHODOLOGY** ....................................... 59

**Water Balance Estimation** ........................................... 60
  - Concept and Methodology ................................... 60

**Supply and Demand of Water for Agriculture Sector** .......... 63
  - Water Supply ......................................................... 63
  - Water Demand ....................................................... 63

**Supply and Demand of Water for Domestic Sector** .......... 64
  - Water Supply ......................................................... 64
  - Water Demand ....................................................... 64

**Supply and Demand of Water for Industrial Sector** .......... 65
  - Water Supply ......................................................... 65
  - Water Demand ....................................................... 66

**Projections of Water Supply and Demand for Various Sectors** 67
  - Agriculture Sector ............................................... 67
  - Assumption for the above models .......................... 67
  - Domestic Water Sector ......................................... 69
Projected water demand for the domestic water sector was estimated considering the following expression:

Projected surface water demand for the domestic water sector was estimated using the following relationship:

Industrial Sector

Estimation of Economic Value of Irrigation Water

The Residual Imputation Approach

Derivation

Measuring and pricing outputs

Marginal Cost Pricing

Linear Programming

The "Change in Net Income" Method

Hypotheses: The following hypotheses were conceived:

CHAPTER 4

WATER BALANCE, SUPPLY AND DEMAND PROJECTIONS

Conceptual frame work of water balance

Water Budget

Alternate Water Budget Estimation

Water Balance for Indus Basin (2003-04)

Estimation of Supply and Demand

Projections of Supply and demand for year 2015

Supply and Demand Projections of Agriculture:

Supply and Demand for the Domestic Use:

Supply and Demand Domestic use:

Projection of Supply and Demand for the Domestic Use 2015:

Industrial Supply and Demand

Projection of Supply and Demand for the Industrial Use 2015:

Demand (BCM)

Water Use Efficiency

Global and Local Definitions

Water Use efficiency:

Irrigation Efficiency

CHAPTER 5

LINEAR PROGRAMMING MODEL AND MODEL RESULTS

Model Validation

The Model Results

Head and Tail Farms Analysis

Sensitivity Analysis of Irrigation water

CHAPTER 6
