# TABLE OF CONTENTS

DEVELOPMENT OF RELATIONSHIPS AMONG VEHICULAR AND DRIVER’S CHARACTERISTICS WITH TRAFFIC ACCIDENTS

## ACKNOWLEDGEMENTS

ABSTRACT ........................................................................................................ v

TABLE OF CONTENTS .................................................................................................. vii

LIST OF TABLES ........................................................................................................... xii

LIST OF FIGURES ......................................................................................................... xiii

LIST OF ABBREVIATIONS ........................................................................................... xv

### CHAPTER 1. INTRODUCTION ............................................................................ 1

1.1 GENERAL ........................................................................................................ 1

1.2 OBJECTIVES OF THE RESEARCH ............................................................. 3

1.3 METHODOLOGY ............................................................................................ 3

1.4 THESIS ORGANIZATION ............................................................................... 5

### CHAPTER 2. DRIVER’S CHARACTERISTICS AND ROAD SAFETY ........... 7

2.1 INTRODUCTION ............................................................................................ 7

2.2 AN OVERVIEW OF PAST RESEARCH ........................................................ 7

2.3 FINALIZATION OF CHARACTERISTICS OF DRIVERS FOR THE STUDY .... 12

2.4 SUMMARY .................................................................................................... 14

### CHAPTER 3. VEHICULAR CHARACTERISTICS AND ROAD SAFETY .. 15

3.1 INTRODUCTION ............................................................................................ 15

3.2 AN OVERVIEW OF PAST RESEARCH ........................................................ 15

3.3 FINALIZATION OF CHARACTERISTICS OF VEHICLES FOR THE STUDY .... 18

3.4 SUMMARY .................................................................................................... 21

### CHAPTER 4. ACCIDENT PREDICTION MODELS ....................................... 22

4.1 INTRODUCTION ............................................................................................ 22

4.2 AN OVERVIEW OF TRAFFIC ACCIDENTS .................................................. 22

4.3 ACCIDENT STATISTICS OF LAHORE ......................................................... 25

4.4 POLICE ENFORCEMENT STRATEGIES TO REDUCE TRAFFIC ACCIDENTS .......................................................... 25

4.5 DEFINITION OF A VARIABLE ....................................................................... 30

4.6 DEFINITION OF A MODEL ............................................................................ 31

4.6.1 Need for developing models .................................................................... 31
4.6.2 Mathematical models ....................................................... 32
4.6.3 Selection of the model for the study ............................... 35
4.7 ACCIDENT PREDICTION MODELS (APMs) ....................... 35
4.8 SUMMARY ........................................................................... 43

CHAPTER 5.  SAMPLING THEORY ................................................. 44
5.1 INTRODUCTION ................................................................. 44
5.2 BASIC CONCEPTS OF STATISTICS AND SAMPLING ........ 44
5.3 THE NEED FOR SAMPLING ............................................... 44
5.4 DESIGNING AND CONDUCTING A SAMPLING STUDY ...... 47
5.4.1 The planning stage ......................................................... 47
5.4.2 The Data collection stage ............................................... 49
5.4.3 The Evaluation stage ..................................................... 50
5.5 BIAS AND ERROR IN SAMPLING ....................................... 50
5.6 SELECTING THE SAMPLE ................................................ 51
5.7 SUMMARY ........................................................................... 52

CHAPTER 6.  DATA COLLECTION AND RESEARCH METHODOLOGY ................................................. 53
6.1 INTRODUCTION ................................................................. 53
6.2 COLLECTION OF DATA ..................................................... 53
6.3 RESEARCH METHODOLOGY .............................................. 54
6.3.1 Selection of vehicles ..................................................... 55
6.3.2 Preparation of questionnaires/survey forms ...................... 55
6.3.3 Selection of sample size ................................................ 55
6.3.4 Establishment of survey teams ....................................... 56
6.3.5 Conduct of survey of vehicles ....................................... 56
6.3.6 Preparation of coding manual ....................................... 57
6.3.7 Data analyses ............................................................... 57
6.4 SUMMARY ........................................................................... 60

CHAPTER 7.  DATA ANALYSIS AND DEVELOPMENT OF ACCIDENT PREDICTION MODEL ................................................. 61
7.1 INTRODUCTION ................................................................. 61
7.2 ANALYSIS OF DATA ........................................................... 61
7.3 MOTORCYCLE RICKSHAW ............................................... 62
7.3.1 Survey Locations for Motorcycle Rickshaw ..................... 63
7.3.2 Frequency Analysis and Discussion ............................... 64
7.3.3 Cross-tabulation Analysis and Discussion ....................... 69
7.3.4 Accident Prediction Model for Motorcycle Rickshaw ........ 71
7.3.5 Verification of accident prediction model for Motorcycle Rickshaw .................................................. 72
7.3.6 Conclusions from Motorcycle Rickshaw Analysis ......... 73
7.4 MOTOR CYCLE ................................................................. 74
7.4.1 Survey Locations for Motorcycle ..................................... 74
7.4.2 Frequency Analysis and Discussion ............................... 78
7.4.3 Cross-tabulation Analysis and Discussion ....................... 81
7.4.4 Accident Prediction Model for Motorcycle ..................... 83
7.4.5 Verification of accident prediction model for Motorcycle .... 85
7.4.6 Conclusions from Motor Cycle Analysis ....................... 85
7.5 PASSENGER CAR ................................................................. 86
  7.5.1 Survey Locations for Passenger Car .................................... 86
  7.5.2 Frequency Analysis and Discussion ...................................... 90
  7.5.3 Cross-tabulation Analysis and Discussion ............................. 94
  7.5.4 Accident Prediction Model for Passenger Car ....................... 96
  7.5.5 Verification of accident prediction model for Passenger Car .... 98
  7.5.6 Conclusions from Passenger Car Analysis ........................... 98
7.6 WAGON ............................................................................... 98
  7.6.1 Survey Locations for Wagon ............................................... 98
  7.6.2 Frequency Analysis and Discussion ...................................... 100
  7.6.3 Cross-tabulation Analysis and Discussion ............................ 103
  7.6.4 Accident Prediction Model for Wagon .................................. 105
  7.6.5 Verification of accident prediction model for Wagon ............. 106
  7.6.6 Conclusions from Wagon Analysis ....................................... 107
7.7 BUS .................................................................................... 107
  7.7.1 Survey Locations for Bus .................................................... 107
  7.7.2 Frequency Analysis and Discussion ...................................... 109
  7.7.3 Cross-tabulation Analysis and Discussion ............................ 112
  7.7.4 Accident Prediction Model for Bus ...................................... 114
  7.7.5 Verification of accident prediction model for Bus ................. 116
  7.7.6 Conclusions from Bus Analysis ........................................... 116
7.8 AUTO RICKSHAW ............................................................... 117
  7.8.1 Survey Locations for Auto Rickshaw .................................... 117
  7.8.2 Frequency Analysis and Discussion ...................................... 121
  7.8.3 Cross-tabulation Analysis and Discussion ............................ 124
  7.8.4 Accident Prediction Model for Auto Rickshaw ...................... 125
  7.8.5 Verification of accident prediction model for Auto Rickshaw ... 127
  7.8.6 Conclusions from Auto Rickshaw Analysis ........................... 127
7.9 PICKUP ............................................................................... 128
  7.9.1 Survey Locations for Pickup ............................................... 128
  7.9.2 Frequency Analysis and Discussion ...................................... 132
  7.9.3 Cross-tabulation Analysis and Discussion ............................ 136
  7.9.4 Accident Prediction Model for Pickup ................................. 137
  7.9.5 Verification of accident prediction model for Pickup ............ 138
  7.9.6 Conclusions from Pickup Analysis ...................................... 139
7.10 COMBINED VEHICLES ......................................................... 139
  7.10.1 Verification of accident prediction model for Combined Vehicles 142
7.11 FUTURE APPLICATION OF APM FOR MOTORCYCLES IN 2015 USING EXAMPLES ....................................................... 142
7.12 COMPARISON OF DEVELOPED APM’S WITH PUBLISHED DATA ................................................................. 146
7.13 SUMMARY ........................................................................... 147

CHAPTER 8. CONCLUSIONS AND RECOMMENDATIONS ................. 148
  8.1 INTRODUCTION ................................................................. 148
  8.2 CONCLUSIONS ................................................................. 148
  8.3 RECOMMENDATIONS ........................................................ 152
  8.4 RECOMMENDATIONS FOR FUTURE RESEARCH ................ 152
