To,

The Controller of Examinations,  
University of Agriculture,  
Faisalabad.

"We, the Supervisory Committee, certify that the contents and form of thesis submitted by Mr. Muhammad Athar have been found satisfactory and recommend that it be processed for evaluation, by the External Examiner for the award of degree."

Supervisory Committee

DEDICATED TO

DR. M. B. SIAL  
(Deceased)

## ACKNOWLEDGMENTS

All praises for Allah, Who guides us in darkness and helps in difficulties and all respects to His prophet HAZRAT MUHAMMAD (may peace be upon him) enlightening our conscience with the essence of faith in Allah, converging His kindness and mercy upon us.

I feel great pleasure to express my heartfelt gratitude and sincerest thanks to Dr. Abu Saeed Hashmi, Associate Professor, Department of Animal Nutrition, for his kind guidance, consistent encouragement, healthy criticism and unfailing kindness throughout the course of this study.

I am greatly obliged to Dr. Abrar Hussain Gilani, Professor and Dean, Faculty of Animal Husbandry, for his scholarly review, valuable suggestions and sympathetic behaviour during the course of these studies.

Thanks are also due to Dr. Nazir Ahmed Chaudhry, Professor and Chairman, Department of Poultry Husbandry, for his affectionate attitude and kind help.

I owe a debt of gratitude to Dr. Kausar A. Malik, Director, Nuclear Institute for Biotechnology and Genetic Engineering (NIBGE), for his sympathetic and kind attitude towards my studies. I am extremely grateful to Dr. Muhammad Ibrahim Rajoka, Principal Scientific Officer, NIBGE, for his valuable suggestions for the planning and execution of this project.

I feel pleasure to place on record my obligations to my friends Gulraiz Ahmed, Ikram-ul-Haq, Abid Maqbool, Jalees Ahmad, Muhammad Shabbir and Muhammad Tariq for their moral support and encouragement.

With a deep sense of appreciation, I offer my sincerest thanks to my affectionate parents, brothers, sisters, wife and children for their prayers and moral support. Their best wishes and prayers enabled me to achieve this most cherished goal.

Muhammad Athar

## CHAPTER

I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	4
III. MATERIALS AND METHODS.....	43
IV. RESULTS AND DISCUSSION.....	73
V. SUMMARY.....	142
LITERATURE CITED.....	146

# LIST OF TABLES

Table NO.	Title	Page
1.1	Composition of agar slant medium for <i>C. utilis</i> .....	44
1.2	Composition of nutrient agar medium for <i>B. flavum</i> ...	44
1.3	Composition of inoculum medium for <i>C. utilis</i> .....	45
1.4	Composition of glucose broth for for <i>B. flavum</i> .....	45
1.5	Composition of growth medium for <i>B. flavum</i> .....	51
1.6	Chemical Composition of ingredients used in rations.	55
1.7	Percent Composition of experimental rations.....	56
2.1	Effect of varying percentages of substrate in water on the production of MBP in growth medium under optimum conditions.....	75
2.2	Analysis of variance of data on MBP as affected by different percentages of substrate in water.....	75
2.3	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying concentration of $\text{CaCl}_2 \cdot 2\text{H}_2\text{O}$ ...	79
2.4	Analysis of variance of data on the production of yeast biomass protein at different concentration of $\text{CaCl}_2 \cdot 2\text{H}_2\text{O}$ .....	80
2.5	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying concentration of $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$ ...	84
2.6	Analysis of variance of data on the production of yeast biomass protein at different concentration of $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$ .....	84

2.7	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying concentration of $\text{KH}_2\text{PO}_4$ .....	87
2.8	Analysis of variance of data on the production of yeast biomass protein at different concentration of $\text{KH}_2\text{PO}_4$ .....	87
2.9	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying concentration of $\text{KCl}$ .....	90
2.10	Analysis of variance of data on the production of yeast biomass protein at different concentration of $\text{KCl}$ .....	90
2.11	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying concentration of $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$ ..	93
2.12	Analysis of variance of data on the production of yeast biomass protein at different concentration of $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$ .....	93
2.13	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying carbon to nitrogen ratios.....	96
2.14	Analysis of variance of data on the production of yeast biomass protein at varying carbon to nitrogen ratios.....	96
2.15	Average total and synthesized protein content of yeast protein in growth medium under optimum conditions at varying levels of acid treatment.....	98

2.16	Analysis of variance of data on the production of yeast biomass protein at varying levels of acid treatment.....	99
2.17	The microbial biomass protein contents (mg/ml) with various concentrations of molasses at different time period under optimized conditions.....	101
2.18	Analysis of variance of data on the production of biomass as affected by the addition of different concentrations of molasses at various time period.....	101
2.19	The microbial biomass protein contents (mg/ml) with various concentrations of CSL at different time period under optimized conditions.....	104
2.20	Analysis of variance of data on the production of biomass as affected by the addition of different concentrations of CSL at various time period.....	105
2.21	Growth kinetics of microbes in batch culture.....	107
2.22	Growth kinetics of microbes during log, stationary and log phase in fed batch culture.....	107
2.23	Balance sheet of major nutrients in the fermentation medium of <i>C. utilis</i> at different time intervals in batch culture.....	109
2.24	Balance sheet of major nutrients in the fermentation medium of <i>C. utilis</i> at different time intervals in fed batch culture.....	110

2.25	Total and extra cellular lysine content in growth medium having different concentrations of molasses.....	112
2.26	Total and extra cellular lysine content in growth. medium having different concentrations of glucose.	113
2.27	Analysis of variance of data with varying levels of molasses on lysine production in fermentation medium.....	114
2.28	Analysis of variance of data on lysine production in the extra cellular fluid as affected by varying levels of molasses.....	114
2.29	Analysis of variance of data on lysisne production in the fermentation medium with varying levels of glucose.....	115
2.30	Analysis of variance of data on lysine production in the extracellular fluid as affected by varying levels of glucose.....	115
2.31	Effect of bacterial inoculation in the fermentation medium of <i>C. utilis</i> on the production of microbial biomass protein.....	117
2.32	Analysis of variance of data on the production of microbial biomass protein with bacterial inoculation in the fermentation medium of <i>C. utilis</i> .....	117
2.33	Amino acid composition of biomass produced in different batches.....	120

2.34	Egg ratios ( % availability) of amino acids of protein biomass cultured in different media as compared to egg ratio.....	123
2.35	Essential amino acid index (EAAI) of biomass protein produced on different batches.....	124
2.36	Analysis of variance of data on the essential amino acid index of microbial protein.....	125
2.37	Average weight gain, feed consumption, feed efficiency, protein efficiency ratio, protein digestibility, net protein utilization and biological values for different rations.....	126
2.38	Analysis of variance of data on weight gain of chicks fed different experimental rations.....	128
2.39	Analysis of variance of data on feed intake of chicks fed different experimental rations.....	130
2.40	Analysis of variance of data on feed efficiency ratio of different experimental rations fed to broiler chicks.....	133
2.41	Analysis of variance of data on protein efficiency ratio of different experimental rations fed to broiler chicks.....	134
2.42	Analysis of variance of data on protein digestibility ratio of different experimental rations fed to broiler chicks.....	136
2.43	Analysis of variance of data on net protein utilization of different experimental rations fed to broiler chicks.....	139

2.44 Analysis of variance of data on biological value  
of different experimental rations fed to  
broiler chicks.....140

# LIST OF FIGURES

No. of Fig.	Title of Figure	Page
1.1	Standard curve for sugar estimation.....	64
1.2	Standard curve for the estimation of carbon..	65
1.3	Standard curve for the estimation of protein.	66
1.4	Standard curve for ribose.....	70
2.1	Effect of various percentages of substrates on the production of MBP.....	76
2.2	Av. total & synthesized protein yeast at varying conc. of $\text{CaCl}_2 \cdot 2\text{H}_2\text{O}$ .....	81
2.3	Av. total & synthesized protein yeast at varying conc. of $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$ .....	83
2.4	Av. total & synthesized protein yeast at varying conc. of $\text{KH}_2\text{PO}_4$ .....	86
2.5	Av. total & synthesized protein yeast at varying conc. of $\text{KCl}$ .....	89
2.6	Av. total & synthesized protein yeast at varying conc. of $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$ .....	92
2.7	Av. total & synthesized protein yeast at varying carbon to nitrogen ratio.....	95
2.8	Production of MBP with various conc. of molasses at different time periods.....	102
2.9	Production of MBP with various conc. of CSL at different time periods.....	104
2.10	Consumption of nutrients for the production of MBP at different time periods ..... (batch culture)	109

2.11	Consumption of nutrients for the production of MBP at different time periods ..... 111 (fed batch culture)	111
2.12	Total and extra cellular lysine in G. medium with different conc. of molasses..... 113	113
2.13	Total and extra cellular lysine in G. medium with different conc. of glucose..... 114	114
2.14	Effect of bacterial inoculation in fermentation of C. utilis on MBP yield..... 119	119
2.15	Average weight gain per chick on different experimental rations..... 128	128
2.16	Total feed consumed per chick on different experimental rations..... 130	130
2.17	Feed conversion ratio at different experimental rations..... 132	132
2.18	Protein efficiency ratio at different experimental rations..... 135	135
2.19	Protein digestibility at different experimental rations..... 137	137
2.20	Net protein utilization at different experimental rations..... 138	138
2.21	Biological value at different experimental rations..... 141	141
