

TABLE OF CONTENTS

1	Introduction	1
2	Some Preliminary Concepts06
2.1	Analytic and Univalent Functions	07
2.2	Differential Subordination	08
2.3	The Class P of Functions	10
2.4	Classes of Analytic Functions	13
2.5	Circular Domains	15
2.6	Conic Domains	17
2.7	Classes of Meromorphic Functions	22
2.8	The Class P_m and Related Classes	25
2.9	Functions with Bounded Boundary(Radius) Rotation.	26
2.10	Meromorphic Functions with Bounded Boundary(Radius) Rotation. .	27
2.11	Some Linear Operators	29
3	On Some Subclasses of Analytic Functions Defined by Fractional Derivative in the Conic Regions	33
3.1	The classes $k \square UK_{\square}^{\square}(m, \square, \square)$ and $k \square MUK_{\square}^{\square}(m, \square, \square)$	34
3.2	Main Results.	36
3.3	Conclusion	42
4	Applications of a Differential Operator to the Class of Meromorphic Univalent Functions.	44
4.1	Introduction	45
4.2	Main Results.	46
4.3	Conclusion	55

5	A Class of Meromorphic Bazilevič Type Functions Defined by a Differential Operator.	56
5.1	Introduction	57
5.2	Preliminary Lemmas	59
5.3	Main Results.	62
5.4	Conclusion	72
6	On Certain Subclasses of Meromorphic Univalent Functions Associated with a Differential Operator.	73
6.1	Introduction	74
6.2	Main Results.	76
6.3	Conclusion	84
7	Applications of Conic Type Regions to Subclasses of Meromorphic Univalent Functions with Respect to Symmetric Points.	85
7.1	Introduction	86
7.2	Main Results.	87
7.3	Conclusion	98
8	On Certain Subclasses of Meromorphic Univalent Functions Associated with a Differential Operator.	99
8.1	Introduction	100
8.2	Main Results.	102
8.3	Conclusion	110
9	Conclusion	111
10	References	117
