ASTM: Standard Test Methods for Vulcanized Rubber Thermoplastic Elastomers-Tension	276

## **Section # 1      An Introduction to Ablative Materials and Investigation Techniques**

<b>Chapter 1 Introduction</b>	<b>1</b>
1.1. Ablative composites	1
1.2. The role of ablative composites	2
1.2.1. Thermal Protection System for space vehicle reentry	2
1.2.2. Thermal Protection System for ballistic missiles	4
1.3. Ablation Mechanism	6
1.3.1. Input heat flux ( $\dot{Q}_{in}$ )	7
1.3.2 Pyrolysis or charring heat flux ( $\dot{Q}_{ch}$ )	9
1.3.3 Vaporization heat flux ( $\dot{Q}_{vap}$ )	9
1.3.4 Transpirational cooling flux ( $\dot{Q}_{tr}$ )	9
1.3.5 Reradiational heat flux ( $\dot{Q}_{rad}$ )	10
1.3.6 Sensitive Heat flux ( $\dot{Q}_s$ )	10
1.3.7 Incoming heat flux equation encapsulation	10
1.4 Ablation, associated reactions and phase changes	11
1.4.1 Chemical Reactions and Phase changes in ablation	11
1.4.2 Reactions at Ablator Surface	11
1.4.3 Vaporization and sublimation	11
1.4.4 Surface Pyrolysis	15
1.4.5 Reactions in the depth of a charring ablator	16
1.4.6. Pyrolysis of ablative polymers	16
1.4.7 Ablative chars	17
1.4.8 Cracking reactions	17

1.4.9 Char-volatiles reactions	18
1.4.10 Char-reinforcement interactions	19
1.5 Ablative density	20
1.6 Comparative casing wall temperature profiles of alloy, metals and polymer	20
1.7 Ideal ablative requisites	22
1.8 References	23
<b>Chapter 2 Ablative Materials</b>	<b>26</b>
2.1. Brief History of ablative materials	26
2.2. Polymeric matrices	30
2.2.1. Silicon rubber	30
2.2.1.1. Uses	31
2.2.2. Ethylene Propylene Diene Monomer (EPDM) rubber	31
2.2.2.1. Uses	32
2.2.3. Styrene butadiene rubber (SBR)	32
2.2.3.1. Uses	34
2.2.4. Acrylonitrile butadiene rubber (NBR)	34
2.2.4.1 Uses	37
2.2.5. Phenolic resin	37
2.2.5.1 Uses	39
2.3. Processing aids	39
2.3.1. Crosslinker	39
2.3.1.1. Sulphur	39
2.3.1.2. Dicumyl peroxide	40
2.3.2. Primary accelerator (MBTS)	40
2.3.3. Secondary accelerator HBS	40
2.3.4. Secondary accelerator TMTD	41
2.3.5. Processing oils	41
2.3.6. Paraffin wax	42
2.3.7. Activators	42
2.3.8. Silane coupling agent	42
2.4. Reinforcements	43
2.5. References	44

<b>Chapter 3 Ablatives Fabrication, Investigation and Characterization Techniques</b>	<b>50</b>
3.1 Fabrication of Ablative Rubber Composites	50
3.2 Ablation Investigation	53
3.2.1. Backface temperature recording	53
3.2.2. Ablation rates	56
3.3 Characterization techniques	57
3.3.1. Mechanical testing	57
3.3.2. Scanning electron microscopy	58
3.3.3. Thermogravimetric and differential thermal analysis	59
3.3.4. Thermal Conductivity Measurements	60
3.4. References	61

## **Section # 2      MWCNTs Impregnated Ablative nanocomposites**

<b>Chapter 4 Ablation, Thermal and Mechanical Characteristics of MWCNT/Silicon Rubber Nanocomposites</b>	<b>62</b>
4. Introduction	62
4.1. Formulation MWCNTs/ Silicone rubber Nanocomposites	63
4.2. Dispersion of MWCNTs in silicone matrix	63
4.3. Ablation Testing	63
4.3.1. Backface temperature analysis	63
4.3.2. Ablation rates	66
4.3.2.1. Linear /mass ablation rates and char yield	66
4.3.2.2. Radial/mass ablation rates and char yield	67
4.4. Thermogravimetric/differential thermal analyses	68
4.4.1. Thermal degradation analysis	68
4.4.2. Differential Thermal analysis	70
4.5. Mechanical Testing	71
4.5.1. Tensile properties	71

4.5.2. Shore A rubber hardness	72
4.6. Thermal Conductivity Measurements	73
4.6. Conclusion	74
4.7. References	75
<b>Chapter 5 MWCNT/Ethylene Propylene Diene Monomer Ablative Nanocomposites</b>	<b>77</b>
5. Introduction	77
5.1 Formulation MWCNT/Ethylene Propylene Diene Monomer rubber nanocomposites	78
5.2. Dispersion of MWCNTs in Ethylene Propylene Diene Monomer rubber	78
5.3. Ablation Testing	79
5.3.1. Backface temperature analysis	79
5.3.2 Ablation rates	81
5.3.2.1 Linear /mass ablation rates and char yield	81
5.3.2.2 Radial /mass ablation rates and char yield	82
5.4 Thermogravimetric/differential thermal analyses	84
5.4.1 Thermal degradation behavior	84
5.4.2. Differential thermal analysis	85
5.5 Mechanical Testing	86
5.5.1 Tensile properties	86
5.5.2 Hardness	87
5.6. Thermal Conductivity Measurements	87
5.6. Conclusion	88
5.7. References	90
<b>Chapter 6 MWCNT/Styrene Butadiene Rubber Ablative Nanocomposites</b>	<b>92</b>
6. Introduction	92
6.1. Formulations of the MWCNTs/Styrene Butadiene rubber nanocomposites	93
6.2. Dispersion of MWCNTs in Styrene Butadiene rubber	93

6.3 Ablation Testing	93
6.3.1 Backface temperature analysis	93
6.3.2 Ablation rates	96
6.3.2.1. Linear /mass ablation rates and char yield	96
6.3.2.2. Radial /mass ablation rates and char yield	96
6.4 Thermogravimetric/differential thermal analyses	98
6.4.1 Thermal decomposition behavior	98
6.4.2 Differential thermal analysis	100
6.5 Mechanical Testing	101
6.5.1 Tensile properties	101
6.5.2 Rubber hardness	102
6.6. Thermal Conductivity Measurements	102
6.6. Conclusion	103
6.7. References	104

## **Chapter 7 MWCNT/NBR Polymer Nanocomposites: Ablation, Thermal & Mechanical Investigation**

7. Introduction	107
7.1. Formulation MWCNT/Nitrile Butadiene rubber nanocomposites	108
7.2. Dispersion of MWCNTs in Nitrile Butadiene Rubber	108
7.3. Ablation Testing	108
7.3.1. Backface temperature profile	108
7.3.2. Ablation rates	112
7.3.2.1. Linear /mass ablation rates and char yield	112
7.3.2.2. Radial /mass ablation rates and char yield	112
7.4. Thermogravimetric/differential thermal analyses	115
7.4.1. Thermal degradation analysis	115
7.4.2. Differential thermal analysis	116
7.5. Mechanical Testing	116
7.5.1. Tensile properties	116

7.5.2. Rubber hardness	118
7.6. Thermal Conductivity Measurements	119
7.6. Conclusion	119
7.7. References	120
<b>Comparative Ablation and Thermo-Mechanical Analysis of MWCNTs Incorporated Polymer Nanocomposites</b>	<b>122</b>
Reference	124

### **Section # 3      Nanoclays Incorporated NBR Ablative Nanocomposites**

<b>Chapter 8 Ablation, Thermal &amp; Mechanical Investigation of Nanokaolinite Nitrile Butadiene Rubber Composites</b>	<b>125</b>
8. Introduction	125
8.1. Formulation of Nanokaolinite/NBR nanocomposites	126
8.2. Ablation testing	126
8.2.1. Backface temperature profile	126
8.2.2. Ablation rates	127
8.2.2.1 Linear /mass ablation rates and char yield	127
8.2.2.2 Radial /mass ablation rates and char yield	129
8.3. Thermogravimetric/differential thermal analyses	131
8.3.1. Thermal degradation behavior	131
8.3.2. Differential thermal analysis	132
8.4. Mechanical testing	133
8.4.1. Ultimate tensile strength	133
8.4.2. Rubber hardness	135
8.5. Thermal Conductivity Measurements	135
8.5. Conclusion	135
8.6. References	136
<b>Chapter 9 Montmorillonite Impregnated Acrylonitrile Butadiene Rubber Nanocomposites: Ablation &amp; Thermo-Mechanical Investigation</b>	<b>138</b>

9. Introduction	138
9.1. Formulation of Na-MMT/NBR composites	139
9.2. Ablation testing	139
9.2.1. Backface temperature profile	139
9.2.2. Ablation rates	140
9.2.2.1. Linear/mass ablation rates and char yield	140
9.2.2.2. Radial/Mass ablation rates and char yield	141
9.3. Thermogravimetric/differential thermal analyses	144
9.3.1. Thermal oxidation	144
9.3.2. Differential thermal analysis	145
9.4. Mechanical testing	145
9.4.1. Ultimate tensile strength	145
9.4.2. Hardness	148
9.5. Thermal Conductivity Measurements	149
9.5. Conclusion	149
9.6. References	150

### **Section # 4      Fine Cork and Phenol Formaldehyde–NBR Ablative Composites**

#### **Chapter 10 Thermo–Mechanical and Ablation Characteristics of the**

<b>Fine Cork Impregnated Ablative Composites</b>	<b>154</b>
10. Introduction	154
10.1. Formulation of Cork/NBR ablative composites	155
10.2. Ablation testing	155
10.2.1. Backface temperature profiles	155
10.2.2. Ablation rates	156
10.2.2.1. Linear/mass ablation rates and char yield	156
10.2.2.2. Radial/mass ablation rates	

and char yield	159
10.3. Thermogravimetric/differential thermal analyses	159
10.3.1. Thermal degradation behavior	159
10.3.2. Differential thermal analysis	161
10.4. Mechanical testing	162
10.4.1 Ultimate tensile strength	162
10.4.2. Rubber hardness	164
10.5. Thermal Conductivity Measurements	165
10.5. Conclusion	166
10.6. References	166
<b>Chapter 11 NBR/Phenolic Resin Blended Ablative Composites</b>	<b>168</b>
11. Introduction	168
11.1 Formulation of Phenolic resin/NBR ablative composite	169
11.2 Ablation Testing	170
11.2.1 Backface Temperature Sensing	170
11.2.2 Ablation Rates	172
11.2.2.1 Linear/mass ablation rate and char yield	172
11.2.2.2 Radial/mass ablation rates and char yield	172
11.3. TG/DT Analysis	175
11.3.1 Thermogravimetric analysis	175
11.3.2 Differential Thermal analysis	176
11.4 Mechanical Properties	176
11.4.1. Ultimate tensile strength	176
11.4.2. Hardness (Shore A)	176
Thermal Conductivity Measurements	178
11.5 Conclusion	179
11.6. References	179
<b>Comparative Ablation and Thermo-Mechanical Analysis of Cork and Phenolic Resin Incorporated Polymer Nanocomposites</b>	<b>181</b>
Reference	183

## **Section # 5      Synthetic Fiber Reinforced NBR Ablative Composites**

<b>Chapter 12 Carbon Fiber/NBR Ablative Composites</b>	<b>184</b>
12. Introduction	184
12.1. Formulation of Carbon fiber based NBR rubber composite	185
12.2. Dispersion of Carbon fiber in NBR matrix	185
12.3. Ablation testing	186
12.3.1. Backface temperature profiles	186
12.3.2. Ablation rates	188
12.3.2.1. Linear/mass ablation rates and char yield (%)	188
12.3.2.2. Radial/mass ablation rates and char yield (%)	188
12.4. Thermogravimetric/differential thermal analysis	191
12.4.1. Thermal stability of composite	191
12.4.2. Heat flow behavior	192
12.5. Mechanical properties	193
12.5.1. Ultimate tensile strength	193
12.5.2. Hardness	195
12.6. Thermal Conductivity Measurements	195
12.6. Conclusion	195
12.7. References	196
<b>Chapter 13 Chopped Glass Fibers Impregnated NBR Ablative Composites</b>	<b>198</b>
13. Introduction	198
13.1. Formulation of chopped glass fiber incorporated NBR rubber composites	199
13.2. Dispersion of Glass fiber in NBR matrix	199
13.3. Ablation testing	199
13.3.1. Backface temperature profile	199
13.3.2. Ablation rates	200
13.3.2.1. Linear/mass ablation rates and char yield	200

13.3.2.2. Radial/mass ablation rates and char yields	202
13.4. Thermogravimetric/ differential thermal analysis	204
13.4.1. Thermal Oxidation of composite specimens	204
13.4.2. Heat flow response in air environment in the temperature range 25 to 725°C	205
13.5. Mechanical properties	207
13.5.1. Ultimate tensile strength	207
13.5.2. Rubber hardness	209
13.6. Thermal Conductivity Measurements	209
13.6. Conclusion	209
13.7. References	210

## **Chapter 14 A Comprehensive Ablation Investigation of Kevlar/NBR**

### **Composites 212**

14. Introduction	213
14.1. Formulation of Kevlar fiber based NBR rubber composites	213
14.2. Dispersion of Kevlar fiber in NBR matrix	213
14.3. Ablation testing	213
14.3.1. Backface temperature profile	213
14.3.2. Ablation rates	216
14.3.2.1 Linear ablation rates and char yield	216
14.3.2.2. Radial ablation rates and char yield	216
14.4. Thermogravimetric/ differential thermal analysis	218
14.4.1. Thermal stability of composite	218
14.4.2. Heat flow behavior	220
14.5. Mechanical properties	220
14.5.1. Tensile properties	220
14.5.2. Hardness	221
14.6. Thermal Conductivity Measurements	223
14.6. Conclusion	223
14.7. References	224

## **Chapter 15 Ablation, Mechanical and Thermal Properties of**

### **NBR/Spectra Fiber Polymer Composites 227**

15. Introduction	227
------------------	-----

15.1. Formulation of Spectra fiber impregnated NBR rubber composite	228
15.2. Dispersion of Spectra fiber in NBR matrix	228
15.3. Ablation testing	230
15.3.1. Backface temperature profiles	230
15.3.2. Ablation rates	231
15.3.2.1. Linear ablation rates and char yield	231
15.3.2.2. Radial ablation rates and char yield	233
15.4. Thermogravimetric/differential thermal analysis	235
15.4.1 Thermal stability of composite	235
15.4.2. Heat flow behavior	235
15.5. Mechanical properties	236
15.5.1. Ultimate tensile strength	236
15.5.2. Rubber Hardness	237
15.6. Thermal Conductivity Measurements	238
15.6. Conclusion	239
15.7. References	240
<b>Chapter 16 Ceramic Fiber/NBR Ablative Composites</b>	<b>242</b>
16. Introduction	242
16.1 Formulation of Ceramic fiber based NBR rubber composite	242
16.2. Dispersion of Ceramic fiber in NBR matrix	243
16.3 Ablation testing	243
16.3.1 Backface temperature profile	243
16.3.2 Ablation rates	247
16.3.2.1 Linear ablation rates and char yield	247
16.3.2.2. Radial ablation rates and char yield	248
16.4. Thermogravimetric/differential thermal analysis	248
16.4.1. Thermal stability of composite	248
16.4.2. Heat flow behavior	248
16.5. Mechanical properties	250
16.5.1. Ultimate tensile strength and Hardness	250
16.6. Thermal Conductivity Measurements	251
16.6. Conclusion	253
16.7. References	254

**Comparative Ablation and Thermo-Mechanical Analysis of Synthetic  
Fibers Incorporated Polymer Nanocomposites** **255**

Reference 257

**Section # 6 Conclusion & Future Prospective**

**Chapter 17 Conclusion** **258**

17. Conclusion 258

17.1 Proposed Future Work 265
