## Chapter No. 1

### Catalytic Decomposition of PonceauS for the Kinetic Spectrophotometric Determination of Gallium (III).

---

---

Titles	Page No.
1.1 Introduction of Chemical Kinetics.....	01
1.2 Rate of reaction .....	02
1.3 Effect of different parameters on the rate of reaction.....	02
1.3.1. Nature of the reactant .....	02
1.3.2. Concentration of the reactant.....	03
1.3.3. Surface area of the reactants.....	03
1.3.4. Temperature.....	03
1.3.5. Catalyst.....	03
1.3.6. pH.....	03
1.4 Reaction mechanism associated with kinetic methods.....	04
1.5 Application of kinetics in trace analysis.....	04
1.5.1 Kinetic methods (Non catalytic).....	04
1.5.2 Kinetic methods (catalytic).....	05
1.5.3. Enzymatic method of analysis.....	05
1.5.4. Differential reaction rate methods.....	05
1.6 Scope of Chemical Kinetics.....	06

1.7	Ponceau S.....	07
1.8	Introduction of Gallium.....	08
1.8.1	Sources of Gallium.....	08
1.9	Applications.....	09
1.10	Health Effects of Gallium.....	09
1.11	Review of Literature for the Determination of Gallium.....	10
1.12	Experimental.....	15
1.12.1	Reagents and Chemicals.....	15
1.12.2	Equipment.....	16
1.13.1	Analytical Procedure.....	16
1.13.2	Effect of indicating reagent Ponceau S.....	16
1.13.3	Effect of pH.....	17
1.13.4	Effect of Sulphuric acid.....	17
1.13.5	Effect of Potassium bromate.....	17
1.13.6	Effect of Temperature.....	17
1.13.7	Spectrophotometric Procedure for the determination of Gallium (III) from Medicinal drug.....	17
1.13.8	Spectrophotometric Procedure for the determination of Gallium (III) from Semi- conductor.....	18
1.13.9	Determination of Gallium (III) from Medicinal drug and Semiconductor by Standard Addition Technique.....	18
1.14	Results and Discussion.....	18
1.15	Conclusion.....	22

## Chapter No. 2

### HPLC Determination of $\alpha$ -Keto acids in Human Serum and Urine using 4-Nitro-1, 2-phenylenediamine as Derivatizing Reagent

Titles	Page No.
2.1 Analytical Chemistry.....	23

2.1.1	Introduction.....	23
2.1.2	History.....	24
2.2.	Spectrophotometry .....	24
2.2.1	Ultraviolet-Visible (UV/ VIS) Spectrophotometry.....	24
2.3.	Chromatography.....	25
2.3.1.	High Performance Liquid Chromatography (HPLC).....	25
2.3.2.	Basic principle of Chromatography.....	26
2.3.4.	The Advantages of HPLC .....	26
2.3.5.	Liquid Chromatography Modes.....	28
2.3.6.	Adsorption (Normal Phase) Chromatography.....	28
2.3.7.	Reverse Phase (Hydrophobic Separation) Chromatography.....	29
2.3.8.	Size Exclusion Chromatography.....	29
2.3.9.	Ion- Exchange Chromatography.....	30
2.4.	Basic Instrumental Components of HPLC system .....	30
2.4.1.	High Pressure Pumping system.....	31
2.4.2.	Column.....	32
2.4.3.	Normal Phase Packing Material.....	32
2.4.4.	Reverse Phase Packing Material.....	33
2.4.5.	Mobile Phase .....	33
2.4.6.	Sample Injector System .....	34
2.4.7.	Selection of Column Diameter.....	34
2.4.8.	Chromatogram .....	35
2.5.	Physical Parameters of HPLC .....	35
2.5.1.	Retention time and Dead Time .....	35
2.5.2.	Adjusted Retention Time ( $t_R'$ ).....	35
2.5.3.	Distribution Coefficient .....	36
2.5.4.	Capacity Factor ( $k'$ ).....	36
2.5.5.	Selectivity ( $\alpha$ ).....	36
2.5.6.	Efficiency .....	36
2.5.7.	Resolution .....	37
2.5.8.	Number of Theoretical Plates.....	37

2.6.	Detectors.....	37
2.6.1.	Spectrophotometric Ultraviolet Detector.....	38
2.6.2.	Photo-Diode Array detector.....	38
2.7.	Derivatization.....	40
2.8.	Introduction of Keto acids.....	41
2.9.	Carbohydrate Metabolism Markers.....	42
2.10.	Uses of $\alpha$ - ketoacids as drugs.....	43
2.11.	Literature Review .....	44
2.12.	Experimental .....	58
2.12.1.	Reagents.....	58
2.12.2	Equipment.....	58
2.13.	Analytical Procedures.....	59
2.13.1.	Spectrophotometric Procedure.....	59
2.13.2.	HPLC Procedure.....	59
2.14.1.	Analysis of Pharmaceutical preparation.....	60
2.14.2.	Analysis of Pharmaceutical Preparation by Standard Addition.....	60
2.15.	Sample Collection and Pretreatment.....	60
2.15.1.	Determination of $\alpha$ -Keto Acids from Serum.....	60
2.15.2.	Determination of $\alpha$ -Keto Acids from Serum using Linear Calibration Curve with Spiked Sample.....	61
2.15.3.	Determination of $\alpha$ -Keto acids from Urine.....	61
2.15.4.	Determination of $\alpha$ -Keto acids from Urine by Standard Addition.....	61
2.16.	Results and Discussion.....	61
2.17.1.	Quantitation and Validation.....	68
2.17.2.	Linearity and limit of detection.....	68
2.17.3.	Precision Recovery.....	72
2.17.4.	Sample Analysis.....	73
2.18.	Conclusion.....	81

## Chapter No 3

### HPLC Determination of $\alpha$ -oxoaldehydes $\alpha$ -oxo acids from Human Serum of Diabetic and Uremic Patients using 4-nitro-1, 2-phenylenediamine as Derivatizing Reagent

Titles	Page No.
3.1 Introduction.....	82
3.1.1. Glyoxal (C <sub>2</sub> H <sub>2</sub> O <sub>2</sub> ).....	83
3.1.2. Methylglyoxal (C <sub>3</sub> H <sub>4</sub> O <sub>2</sub> ).....	84
3.1.3. Formation and Detoxification .....	86
3.1.4. Reactivity.....	87
3.1.5. Presence in Diseases.....	88
3.1.6 Dimethylglyoxal.....	88
3.2. Literature Review.....	89
3.3. Experimental.....	105
3.3.1. Chemicals and Reagents.....	105
3.4 Analytical Procedures.....	105
3.4.1. Spectrophotometric procedure.....	105
3.4.2. HPLC Procedure.....	106
3.5.1. Determination of Oxaldehyde and Oxo- acids from Serum.....	106
3.5.2 Determination of Oxaldehyde and Oxoacids from Serum using Linear Calibration curve and Spiked Sample.....	106
3.6. Results and Discussion.....	107
3.6.1 Derivatization.....	107
3.6.2 Chromatography.....	108
3.6.3. Validation Quantitation.....	111
3.6.4. Analysis of Biological Samples (Serum).....	111

3.7.	Quantitative Analysis of Glyoxal, Methylglyoxal and Dimethylglyoxal from Foods, Beverages and Wines using HPLC and 4- Nitro-1, 2 Phenylenediamine as Derivatizing Reagent.....	116
3.8.	Experimental .....	116
3.8.1	Equipments and Reagents .....	117
3.9.	Analytical Procedures.....	117
3.9.1	Spectrophotometric procedure.....	117
3.9.2	HPLC procedure.....	117
3.10.	Analyses of Foods, Beverages, Beers and Wines.....	117
3.10.1.	Determination of Go, MGo and DMGo by Standard Addition.....	118
3.11.	Results and Discussion.....	118
3.11.1	Optimization of Derivatization and Separation.....	119
3.11.2	Quantitation and Validation.....	121
3.11.3	Samples Analyses.....	122
3.12.	Conclusion.....	124

## Chapter No. 4

### HPLC Determination of $\alpha$ -Keto acids in Human Serum using Meso-Stilbenediamine as Derivatizing Reagent.

Titles	Page No.
4.1. Introduction.....	126
4.2. Experimental.....	127
4.2.1. Preparation of Stilbenediamine.....	127
4.2.2. Chemicals.....	127
4.2.3. Preparation of Hydrobenzamide.....	127
4.2.4. Preparation of amarine (2, 4, 5 – triphenyl – 3 – imidazoline).....	127
4.2.5. Preparation of N <sup>1</sup> - benzol – N <sup>1</sup> – acetyl –meso-stilbenediamine.....	128
4.2.6. Preparation of Meso – stilbenediamine.....	128

4.3.1. Chemicals and Reagent.....	128
4.3.2. Equipment.....	129
4.4. Analytical Procedures.....	129
4.4.1. Spectrophotometric Procedure.....	129
4.4.2. HPLC Procedure.....	129
4.4.3. Determination of $\alpha$ -Keto Acids from Human Serum.....	129
4.4.4. Determination of $\alpha$ -Keto Acids from Serum using Linear Calibration Curve with Spiked Sample.....	130
4.4.5. Determination of $\alpha$ -Keto acids from Urine.....	130
4.5. Results and Discussion.....	131
4.5.1 Optimization of Derivatization and Separation.....	131
4.5.2 Quantitation and Validation.....	136
4.5.3. Sample Analysis .....	141
4.5.5. Conclusion.....	147

## Chapter No. 5

### HPLC Determination of $\alpha$ - Keto acids from Serum using 2, 3-Diamino-2, 3-dimethyl butane and as Derivatization Reagents.

Titles	Page No.
5.1. Introduction.....	148
5.2. Experimental.....	148
5.2.1. Preparation of 2, 3-diamino2, 3-dimethybutane (DDB) .....	148
5.3.1. Chemicals and Reagent.....	150
5.3.2. Equipment.....	150
5.4. Analytical Procedure.....	150
5.4.1. HPLC- Analytical Procedure.....	150
5.4.2. Sample Collection and Pretreatment.....	150

5.4.3. Determination of PYR, KB, MKBA, KG, K3MVA, K4MVA, and PPY from Blood samples .....	151
5.4.4. Determination of PYR, KB, MKBA, KG, K3MVA, K4MVA, and PPY from Blood samples by Standard Addition Method.....	151
5.5. Results and Discussions.....	151
5.5.1. Derivatization and separation.....	151
5.5.2. Qunatitation and Validation.....	160
5.5.3. Sample Analysis.....	161
5.6. Conclusion.....	163

## Chapter No. 6

Titles	Page No.
6.1 General Results and Discussion.....	165

## Chapter No. 7

Titles	Page No.
7.1 Conclusions .....	172
7.2 Suggestion for further work .....	174
7.3 Socio-Economical Benefits.....	175

## Chapter No. 8

Titles	Page No.
7.1 References.....	176
