1	Introduction	3
1.1	Quantum Revolution: Review and Applications	4
1.2	Wave packet: Realization and its Dynamics	8
1.3	Outlines	11
2	Fermi-Ulam Accelerator: An Introduction	14
2.1	Classical Model	15
2.2	Quantum Mechanical Model	18
2.2.1	Dimensionless quantities	21
2.2.2	Floquet Solutions	23
2.2.3	Eigen Solution via Reversible Transformation	26
2.2.4	Modified Fermi-Ulam Model	32
2.3	Experimental Realization	35
3	Wave Packet Dynamics in Space and Time	37
3.1	Quantum Revivals: What it Stand for?	37
3.1.1	General Revival Structure	41
3.2	Symmetric Revivals in one dimensional box	43
3.2.1	Probability Density	45
3.2.2	Autocorrelation Function	52
3.3	Asymmetric Revivals in driven one dimensional box	57
3.3.1	Graphical Illustrations of Asymmetric Revivals	58
3.3.2	Asymmetric Revivals in Space and time	64

3.3.3	Spatio-Temporal Structures	67
3.3.4	Breathing Modes in Spatio-Temporal Structure	73
3.4	Experimental Evidences	76
4	Revivals Identification through Wigner Function and Information Entropy	78
4.1	Wigner Distribution	79
4.1.1	Wigner Distribution: Fundamentals	81
4.1.2	Wigner distribution: Eigenvalue solution	84
4.1.3	Wigner Distribution: Time dependent wave packet solution	87
4.2	Information Entropy	96
4.2.1	Quantum Revivals by Time Dependent Information Entropy	100
4.3	Information Entropy and Wigner function: Mutual connectivity	105
5	Summary and Conclusions	108
