ABSTRACT -----	-iii
DEDICATION -----	-v
ACKNOWLEDGEMENT -----	-vi
TABLE OF CONTENTS -----	-vii
LIST OF TABLES -----	-xiv
LIST OF FIGURES -----	-xix
LIST OF SYMBOLS / ABBREVIATIONS -----	-xxiii
 CHAPTER	
1. INTRODUCTION -----	1
1.1 Dyes and dyeing -----	1
1.2 Classification of dyes -----	2
1.3 Anionic dyes -----	3
1.3.1 Direct dyes -----	3
1.3.2 Reactive dyes -----	4
1.3.3 Acid dyes -----	5
1.4 The need for auxiliaries -----	5

1.5 Classification of auxiliaries -----	6
1.5.1 Classification of surfactants -----	7
1.6 Pretreatments and aftertreatments for anionic dyes -----	8
1.6.1 Cationic fixing agents -----	9
1.6.1.1 Quaternary ammonium salts -----	11
1.7 Problems encountered with the fixing agents -----	14
1.8 Plan of work -----	14
2. LITERATURE REVIEW -----	17
2.1 General development -----	18
2.2 Monomeric quaternary ammonium salts -----	23
2.2.1 Azetidinium chloride -----	25
2.2.2 Epoxy and halohydroxy propyl derivatives -----	27
2.2.3 Mono- and bis- reactive haloheterocyclic derivatives -----	34
2.3 Polymeric quaternary ammonium salts -----	38
3. EXPERIMENTAL WORK -----	49
3.1 General information -----	50
3.2 Synthesis of mono- and bis-reactive 2,3-epoxy / 3-chloro-2- hydroxy propyl derivatives of quaternary ammonium chloride -----	52
3.2.1 General procedure for the synthesis of mono- and bis-reactive 2,3-epoxypropyl derivatives (28a-d and 30a-b) -----	55
N-Cyanomethyl-N-(2,3-epoxypropyl)-N,N-dimethyl ammonium chloride (28a) -----	55

N-Carboxymethyl-N-(2,3-epoxypropyl)-N,N-dimethyl ammonium chloride (28b) -----	56
N-Cyanoethyl-N-(2,3-epoxypropyl)-N,N-dimethyl ammonium chloride (28c) -----	57
N-Carboxyethyl-N-(2,3-epoxypropyl)-N,N-dimethyl ammonium chloride (28d) -----	57
Methylene bis-[N-(2,3-epoxypropyl)-N,N-diethyl ammonium chloride] (30a) -----	58
Ethylene bis-[N-(2,3-epoxypropyl)-N,N-dimethyl ammonium chloride] (30b) -----	59
3.2.2 General procedure for the synthesis of mono- and bis-reactive 3-chloro-2-hydroxypropyl derivatives (29a-d and 31a-b) -----	59
N-Cyanomethyl-N-(3-chloro-2-hydroxypropyl)-N,N- dimethylammonium chloride (29a) -----	60
N-Carboxymethyl-N-(3-chloro-2-hydroxypropyl)-N,N- dimethylammonium chloride (29b) -----	61
N-Cyanoethyl-N-(3-chloro-2-hydroxypropyl)-N,N- dimethylammonium chloride (29c) -----	62
N-Carboxyethyl-N-(3-chloro-2-hydroxypropyl)-N,N- dimethylammonium chloride (29d) -----	62
Methylene bis-[N-(3-chloro-2-hydroxypropyl)-N,N- diethylammonium chloride] (31a) -----	63

Ethylene bis-[N-(3-chloro-2-hydroxypropyl)-N,N-	
dimethylammonium chloride] (31b) -----	64
3.3 Applications -----	64
3.3.1 Application of cationic fixing agents as pretreatment -----	65
3.3.1.1 Pretreatment of cotton fabrics -----	65
3.3.2 Dyeing conditions for untreated cotton fabrics -----	66
3.3.2.1 Dyeing of untreated cotton fabrics with direct dyes by conventional method -----	66
3.3.2.2 Dyeing of untreated cotton fabrics with reactive dyes by conventional method -----	66
3.3.2.3 Dyeing of wool fabrics with acid dyes -----	67
3.3.3 Dyeing conditions for pretreated cotton fabrics -----	67
3.3.3.1 Dyeing of pretreated cotton fabrics with direct dyes -----	67
3.3.3.2 Dyeing of pretreated cotton fabrics with reactive dyes --	68
3.3.3.3 Dyeing of untreated and pretreated cotton fabrics with acid dyes -----	69
3.3.4 Application of cationic fixing agents as an aftertreatment -----	70
3.3.4.1 Dyeing with direct dyes -----	70
3.3.4.2 Aftertreatment with cationic fixing agent (30b) -----	71
3.4 Colour measurement -----	71
3.5 Fastness testing -----	72
3.5.1 Wash fastness -----	72

3.5.1.1	Test procedure -----	73
3.5.2	Light fastness -----	73
4.	RESULTS AND DISCUSSION -----	74
4.1	Synthesis of mono- and bis-reactive 2,3-epoxy and 3-chloro-2-hydroxy propyl derivatives -----	75
4.2	Applications -----	77
4.2.1	Pretreatment with cationic fixing agents -----	78
4.2.1.1	Effect of temperature and time on the cationisation of cotton fabrics -----	78
4.2.1.2	Effect of cationic agent (owf) and sodium hydroxide (ow cationic agent) concentrations on the cationisation of cotton fabrics -----	81
4.2.2	Dyeing of untreated and pretreated cotton fabrics with direct dyes -----	84
4.2.2.1	Effect of dyeing temperature -----	84
4.2.2.2	Effect of dyeing time -----	87
4.2.2.3	Effect of dye concentration -----	89
4.2.2.4	Effect of cationic agent concentration -----	91
	Shades of direct dyes on untreated (C) and pretreated (C-1, C-2 and C-3; 2% owf) cotton fabrics -----	97
4.2.3	Dyeing of untreated and pretreated cotton fabrics with reactive dyes -----	99

4.2.3.1	Effect of dyeing temperature -----	99
4.2.3.2	Effect of dyeing time -----	102
4.2.3.3	Effect of dye concentration -----	104
4.2.3.4	Effect of cationic agent concentration -----	106
4.2.3.5	Effect of alkali (anhydrous Na ₂ CO ₃) -----	108
	Shades of reactive dyes on untreated (C) and pretreated (C-1, C-2 and C-3; 2% owf) cotton fabrics -	114
4.2.4	Dyeing of untreated and pretreated cotton fabrics with acid dyes -----	117
	Shades of acid dyes on wool, untreated (C) and pretreated (C-1, C-2 and C-3; 2% owf) cotton fabrics -----	121
4.2.5	Aftertreatment of direct dyes with a bis-reactive cationic fixing agent -----	122
4.2.5.1	Effect of pH on the aftertreatment of direct dyeings ----	122
4.2.5.2	Effect of cationic agent concentration on the aftertreatment of direct dyeings -----	126
	Shade change of direct dyeings by aftertreatment with a bis-reactive derivative (30b) -----	127
5.	CONCLUSIONS -----	128
	REFERENCES -----	132
	VITA -----	144
