

Table of Contents

No.	Title	Page No.
1	Introduction	1
2	Review of literature	3
2.1	Agricultural productivity affected by salinity	3
2.2	Salinity in Pakistan	4
2.3	Effects of salinity on plant	5
2.3.1	Effect of salinity at whole plant level	6
2.3.2	Effect of salinity on plant growth characteristics	6
2.3.3	Effects of salinity on water relations	8
2.3.4	Effects of salinity on photosynthesis	9
2.3.5	Effects of salinity on leaf structure and anatomy	10
2.3.6	Effects of salinity on ionic contents	11
2.3.7	Na ⁺ influx and its toxicity under salt stress	12
2.3.7.1	Apoplasmic Na ⁺ toxicity	13
2.3.7.2	Cytosolic Na ⁺ toxicity	13
2.3.8	Role of potassium in higher plants	14
2.3.9	Competition between K ⁺ and Na ⁺	15
2.4	Biochemical changes in response to salt stress	17
2.5	Two-phase salinity model for effects on growth	19
2.6	Effect of salinity on wheat	21
2.7	Salt tolerance	21

2.8	Mechanisms of salt tolerance in wheat and other plants	22
2.8.1	Role of Na ⁺ exclusion and compartmentation in salt tolerance	23
2.8.2	Cytosolic K ⁺ /Na ⁺ ratio is critical for plant salt tolerance	25
2.8.3	Root Na ⁺ influx is a critical determinant of Na ⁺ toxicity in wheat	26
2.8.4	Regulation of osmotic potential by synthesis of compatible solutes	26
2.8.4.1	Role of K ⁺ in salt tolerance	28
2.8.4.2	Influence of growth stage on salinity tolerance	28
2.9	Use of salt tolerant plants	30
2.10	Genetic diversity among plant genotypes for salt tolerance	31
2.11	Previous approaches to improve salt tolerance in wheat	32
2.12	Research Needs	33
2.13	Objectives of thesis	35
3	Study-1: Genetic variation for transport, uptake and distribution of Na⁺ and its influence on salt tolerance in wheat	37
3.1	Introduction	37
3.2	Materials and Methods	38
3.2.1	Plant material	38
3.2.2	Growth conditions	39
3.2.3	Physiological and biochemical measurements	39
3.2.4	Ionic analysis	41
3.3	Results	42
3.3.1	Plant growth and biomass	42
3.3.2	Relative growth rate (RGR)	43

3.3.3	Water relations	44
3.3.4	Biochemical determinations	47
3.3.5	Ionic relations in plant	47
3.4	Discussion	51
4	Study-2: Solute accumulation and distribution altered leaf phenology and development as function of stress tolerance in contrasting wheat genotypes	56
4.1	Introduction	56
4.2	Materials and Methods	57
4.2.1	Plant material and growth conditions	57
4.2.2	Leaf development and anatomical changes	58
4.2.2.1	Leaf elongation (mm)	58
4.2.2.2	Leaf development	58
4.2.2.3	Leaf senescence	58
4.2.2.4	Leaf formation	59
4.2.2.5	Chlorophyll contents (SPAD value)	59
4.2.3	Plant biomass (g)	59
4.2.4	Inorganic ions determination	59
4.2.5	Proline determination	60
4.2.6	Experimental design and statistical analysis	60
4.3	Results	60
4.3.1	Leaf elongation (mm)	60
4.3.2	Number of leaves per plant	61

4.3.3	Leaf formation and senescence	61
4.3.4	Shoot fresh and dry biomass (g plant ⁻¹)	65
4.3.5	Leaf chlorophyll contents (SPAD value)	65
4.3.6	Leaf solute accumulation and distribution	67
4.3.7	Leaf phonological changes as a function of salt accumulation and stress time	67
4.4	Discussion	72
5	Study-3: Validity of growth rate, ion contents and water relations in association with grain yield in wheat genotypes under salt stress	78
5.1	Introduction	78
5.2	Materials and Methods	80
5.2.1	Plant material	80
5.2.2	Experimental conditions	80
5.2.3	Sampling strategy	81
5.2.4	Plant growth analyses	82
5.2.4.1	Shoot fresh and dry biomass	82
5.2.4.2	Relative growth rate (RGR)	82
5.2.4.3	Plant grain yield	83
5.2.5	Plant ionic analysis	83
5.2.6	Leaf chlorophyll (SPAD value) measurement	83
5.2.7	Water relation measurement	84
5.2.8	Statistical analysis	84
5.3	Results	84

5.4	Discussion	98
6	Study-4: Relationship between K⁺ homeostasis and physiological determinants conferring salt tolerance in bread wheat genotypes	103
6.1	Introduction	103
6.2	Materials and Methods	106
6.2.1	Plant material	106
6.2.2	Plant growth conditions and salinity stress	106
6.2.3	Parameters measured	107
6.2.3.1	Chlorophylls contents (SPAD) and photosynthesis efficiency (Fv/Fm)	107
6.2.3.2	Plant ionic analysis (Na ⁺ and K ⁺ contents) and osmolality	107
6.2.3.3	Measurements of Na ⁺ exclusion, Na ⁺ tissue tolerance & osmotic tolerance	108
6.2.3.4	K ⁺ leakage from the roots	
6.2.3.5	Growth and yield components	109
6.2.4	Statistical analysis	109
6.3	Results	109
6.4	Discussion	122
7	General discussion	126
8	References	136
