List of Schemes	ix
Preface	x
<b><i>Chapter-1 Introduction</i></b>	<b><i>1-33</i></b>
1.1 Composite	1
1.2 Types of composites	1
1.2.1 Metal matrix composites (MMCs)	1
1.2.2 Ceramic matrix composites (CMCs)	2
1.2.3 Polymer matrix composites (PMCs)	2
1.3 Polyethylene	4
1.4 Classification of polyethylene	5
1.4.1 High density polyethylene (HDPE)	5
1.4.1.1 Manufacturing processes of high density polyethylene	6
1.4.1.2 Properties of high density polyethylene	6
1.4.1.3 Applications of high density polyethylene	6
1.4.2 Low density polyethylene (LDPE)	7
1.4.2.1 Manufacturing processes of low density polyethylene	7
1.4.2.2 Properties of low density polyethylene	7
1.4.2.3 Applications of low density polyethylene	7
1.4.3 Linear low density polyethylene (LLDPE)	8
1.4.3.1 Manufacturing processes of linear low density polyethylene	8

1.4.3.2	Properties of linear low density polyethylene	8
1.4.3.3	Applications of linear low density polyethylene	9
1.5	Polysaccharides	9
1.5.1	Classification and structure of polysaccharides	9
1.5.1.1	Chitin and chitosan	12
1.5.1.1.1	Applications of chitosan	13
1.5.1.2	Starch	14
1.5.1.2.1	Applications of starch	16
1.5.1.3	Cellulose and cellulose derivatives	17
1.5.1.3.1	Cellulose Acetate	18
1.5.1.3.2	Carboxymethyl cellulose	18
1.6	Clay minerals	20
1.6.1	Sepiolite	21
1.7	Compatibility	22
1.7.1	Silane coupling agents	22
1.7.2	Silane crosslinked polymer composites	23
1.7.3	Applications of silane coupling agents in advanced materials	24
1.8	Literature review	25
1.8.1	Chitosan composites with synthetic polymers	25
1.8.1.1	Chitosan composites with natural polymers	27
1.8.2	Starch/polyolefin composites	28
1.8.3	Cellulose-based composites	30
1.9	Scope and objective of thesis	32
<b>Chapter-2</b>	<b>Experimental</b>	<b>34-44</b>
2.1	Materials for composite preparation	34
2.1.1	High density polyethylene	34

2.1.2	Linear low density polyethylene	34
2.1.3	Chitosan	34
2.1.4	Starch	34
2.1.5	Sepiolite	34
2.1.6	Carboxymethyl cellulose	35
2.1.7	Coupling agents	35
2.1.8	Initiator	35
2.1.9	Dibutyltin dilaurate	35
2.1.10	Stearic acid	35
2.1.11	Solvents	35
2.2.	General procedure for composite's preparation	36
2.2.1	Procedure for the synthesis of HDPE/chitosan composites	37
2.2.2	Procedure for the synthesis of LLDPE/starch/sepiolite composites	38
2.2.3	Procedure for the synthesis of HDPE/CMC composites	38
2.3.	Instruments/characterization techniques	41
2.3.1	Brabender plasti corder mixer	41
2.3.2	Hot press	41
2.3.3	Vacuum oven	41
2.3.4	Particle size analyzer	42
2.3.5	FTIR spectroscopy	42
2.3.6	Gel content analysis	42
2.3.7	Thermogravimetric analysis (TGA)	42
2.3.8	Differential scanning calorimetry (DSC)	42
2.3.9	Melt rheology	43
2.3.10	Melt flow index (MFI)	43

	2.3.11 Tensile properties	43
	2.3.12 Short term creep test	43
	2.3.13 Scanning electron microscopy (SEM)	44
<b>Chapter-3</b>	<b><i>Results and Discussion</i></b>	<b>45-87</b>
3.1	High density polyethylene/chitosan composites	45
3.1.1	Mechanism of silane crosslinking in HDPE/chitosan composites	45
3.1.2	Particle size distribution of chitosan	47
3.1.3	FTIR analysis of HDPE/chitosan composites	48
3.1.4	Gel content analysis of HDPE/chitosan composites	49
3.1.5	Thermogravimetric analysis of HDPE/chitosan composites	49
3.1.6	Differential scanning calorimetry of HDPE/chitosan composites	52
3.1.7	Melt rheology of HDPE/chitosan composites	53
3.1.8	Melt flow index of HDPE/chitosan composites	58
3.1.9	Tensile properties of HDPE/chitosan composites	58
3.1.10	Short term creep test of HDPE/chitosan composites	59
3.1.11	Scanning electron microscopy of HDPE/chitosan composites	60
3.2	Linear low density polyethylene/starch/sepiolite composites	64
3.2.1	Mechanism of silane crosslinking in LLDPE/starch/sepiolite composites	64
3.2.2	Particle size distribution of starch and sepiolite	66
3.2.3	Gel content analysis of LLDPE/starch/sepiolite composites	67
3.2.4	Thermogravimetric analysis of LLDPE/starch/sepiolite composites	67
3.2.5	Differential scanning calorimetry of LLDPE/starch/sepiolite composites	69
3.2.6	Melt rheology of LLDPE/starch/sepiolite composites	70

3.2.7	Tensile properties of LLDPE/starch/sepiolite composites	73
3.2.8	Scanning electron microscopy of LLDPE/starch/sepiolite composites	74
3.3	High density polyethylene/carboxymethyl cellulose composites	76
3.3.1	Mechanism of silane crosslinking in HDPE/CMC composites	76
3.3.2	Particle size distribution of CMC	77
3.3.3	FTIR analysis of HDPE/CMC composites	78
3.3.4	Thermogravimetric analysis of HDPE/CMC composites	79
3.3.5	Differential scanning calorimetry of HDPE/CMC composites	80
3.3.6	Melt rheology of HDPE/CMC composites	81
3.3.7	Tensile properties of HDPE/CMC composites	84
3.3.8	Short term creep test of HDPE/CMC composites	85
3.3.9	Scanning electron microscopy of HDPE/CMC composites	86
	<b>Conclusions</b>	<b>88</b>
	<b>Future plan of work</b>	<b>89</b>
