ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF APPENDICES	xi
1. INTRODUCTION	1
Objectives	3
2. REVIEW OF LITERATURE	4
2.1 Research Status of Tomato Crop for Pulping	4
2.1.1 Mechanical harvesting	4
2.1.2 Effect of temperature	8
2.1.3 Physiochemical effect	13
2.2 Status of Tomato Research in Pakistan	15
2.2.1 Tomato research in the province of Punjab	15
2.2.2 Tomato research in Sindh province of Pakistan	15
2.2.3 Tomato research in N.W.F.P.	16
2.2.4 Tomato research in Baluchistan province	17
2.3 Crop Parameters	18
2.3.1 Texture analysis of tomato	18
2.3.2 Physical characteristics of tomato	19
2.3.3 Chemical characteristics of tomato	20
2.5 Fabrication of Tomato Pulp Machine	21
2.4.1 Tomato hot pulp machines	21
2.4.2 Tomato cold pulp machine	23
2.4.3 Tomato seed extracting machines	24
2.4.4 Tomato skin/peel-color extracting machines	25
2.4.5 Modern trends in tomato pulping	27
2.6 Uses of Tomato By-products	29
2.5.1 History of by-products use	29
2.5.2 New trends in using by-products	29
3. MATERIALS AND METHODS	33
3.1 Machine development and fabrication	33
3.1.1 Development of tomato pulp machine	33
3.1.2 Fabrication of tomato pulp machine	34
3.1.3 Basic components of machine	34
3.1.3.1 Hopper	38
3.1.3.2 Rollers and gears	38
3.1.3.3 Shaft, journal bearings and gears	41
3.1.3.4 Centrifugal strainer spinner with casing	43
3.1.3.5 Main frame	45
3.1.3.6 Three phase electric panel board	45
3.2 Performance and procedure evaluation	48
3.2.1 Performance procedure	48
3.2.2 Texture analysis of tomato varieties for color	53
3.2.3 Texture analysis of tomato varieties for compression	54

3.2.4	Texture analysis of tomato varieties for puncture	58
3.3	Statistical Analysis	61
3.4	Economic Analysis	61
4.	RESULTS AND DISCUSSION	62
4.1	Effect of Roller Diameter on Pulp Extraction Rate and Pulp Percentage..	62
4.2	Effect of Roller Clearance on Pulp Extraction Rate and Pulp Percentage..	64
4.3	Effect of Roller Speed on Pulp Extraction Rate and Pulp Percentage ...	66
4.4	Effect of Crop Maturity on Pulp Extraction and Pulp Percentage	67
4.5	Effect of Crop Variety on Pulp Recovery	69
4.6	Effects of Treatments on Pulp Rate and Pulp Percentage	69
4.6.1	Serrated Rollers (G1)	70
4.6.2	Plain Rollers (G2)	73
4.6.3	Comparison of Serrated and Plain rollers for pulp production	76
4.7	Prediction Models of Pulp Rate and Pulp Percentage	78
4.7.1	Serrated rollers (G1)	78
4.7.1.1	Variety V1	78
4.7.1.2	Variety V2	80
4.7.1.3	Variety V3	81
4.7.1.4	Mathematical prediction model for pulp percentage	82
4.7.2	Plain rollers (G2)	83
4.7.2.1	Variety V1	83
4.7.2.2	Variety V2	84
4.7.2.3	Variety V3	86
4.7.2.4	Mathematical prediction model for pulp percentage	87
4.8	Chemical Analysis of Pulp	88
4.8.1	Effect of cylinder type on brix, pH, TS, Acidity, Sugar reducing, Sugar total, Vitamin and Color of produced pulp	88
4.8.1.1	Effect of cylinder type on brix	89
4.8.1.2	Effect of cylinder type on pH	90
4.8.1.3	Effect of cylinder type on total soluble salts (TS)	90
4.8.1.4	Effect of cylinder type on acidity level (Ac)	91
4.8.1.5	Effect of cylinder type on sugar percent reducing (Sred) and sugar percent total (Sgt)	92
4.8.1.6	Effect of cylinder type on Vitamin C (Vc)	93
4.8.1.7	Effect of cylinder type on color	94
4.8.2	Effect of tomato maturity on brix, pH, TSS, Acidity, Sugar reducing, Sugar total, Vitamin and Color of produced pulp	96
4.8.2.1	Effect of tomato maturity on brix	96
4.8.2.2	Effect of maturity on pH	97
4.8.2.3	Effect of maturity on total soluble salts (TS)	97
4.8.2.4	Effect of maturity on acidity level (Ac)	98
4.8.2.5	Effect of maturity on sugar percent reducing (Sred) and sugar percent total (Sgt)	99
4.8.2.6	Effect of maturity on Vitamin C (Vc)	101
4.8.2.7	Effect of maturity on color	101
4.8.3	Effect of temperature on brix, pH, TSS, Acidity, Sugar reducing, Sugar total, Vitamin and Color of produced pulp	103
4.8.3.1	Effect of tomato temperature on brix	103
4.8.3.2	Effect of temperature on pH	104

4.8.3.3	Effect of temperature on total soluble salts (TS)	105
4.8.3.4	Effect of temperature on sugar percent reducing (Sred) and sugar percent total (Sgt)	106
4.8.3.5	Effect of temperature on Vitamin C (Vc)	107
4.8.3.6	Effect of temperature on color	108
4.9	Seed Recovery from Tomato Pulp Machine	110
4.10	Performance evaluation (Economic analysis)	116
4.10.1	Basic input data for annualized cost method	116
5.	SUMMARY AND CONCLUSIONS	119
5.1	Summary	119
5.2	Conclusions	120
	RECOMMENDATIONS / FURTHER WORK SUGGESTED	123
	LITRATURE CITED	124
