Chapter 1: Introduction	1
1.1 General Objectives	6
1.2 Specific objectives	6
1.3 Theoretical framework	6
1.4 Limitations of the study	8
1.5 Assumptions	8
1.6 Definition of terms	9
Chapter 2: Review of Literature	12
2.1 Studies related to the assessment of technical Competencies possessed by garden owners (Farmers) in Gardening Technology	12
2.2 Studies related to technical competencies possessed By Agricultural Teachers	33

2.3	Synthesis of the literature reviewed	39
Chapter 3: Methodology		40
3.1	Research design	40
3.2	Population	40
3.3	Sample	40
3.4	Instrumentation	41
3.5	Validity of the instrument	43
3.6	Reliability of the instrument	44
3.7	Data collection	45
3.8	Difficulties faces in the data collection and study	45
3.9	Data analysis	47
Chapter 4: Results and Discussion		48
4.1	Tehsil wise Distribution of respondent	48
4.2	Age Group	50
4.3	Education	51
4.4	Size of Land holding	52
4.5	Tenancy status	53
4.6	Garden size	54

4.7	Types of fruit plants	55
4.8	Sources of information	56
4.9	Fruit farmer problems	58
4.10.	Preparation of field	60
4.11.	System layout	62
4.12.	Proper Plant to plant distance	64
4.13.	Size of planting pit	66
4.14.	Filling of pits	68
4.15.	For plants fertilizer application	71
4.16.	Time of fertilizer application	77
4.17.	Irrigations	79
4.18.	Irrigation method	84
4.19.	Weed control	86
4.20.	Recommended pruning method	88
4.21.	Pollination	90
4.22.	Intercropping	91
4.23.	Varieties	93
4.24.	Plant protection measures	95
4.25.	Insects/pests	97
4.26.	Control measures of insects/pests/diseases	99
4.27.	Recommended harvesting practices	100
4.28.	Marketing of fruits	102

4.29.	Means, standard deviations and rank orders of the knowledge, skill and attitude levels of recommended practices concerning mango production, protection, and marketing.	104
4.30.	Means, standard deviations and rank orders of the knowledge, skill and attitude levels of recommended practices concerning citrus production, protection, and marketing.	107
4.31.	Means, standard deviations and rank orders of the knowledge, skill and attitude levels of recommended practices concerning guava production, protection, and marketing.	110
4.32.	Means, standard deviations and rank orders of the knowledge, skill and attitude levels of recommended practices concerning dates production, protection, and marketing.	113
4.33.	Relationship between age group and knowledge, skill, attitude and adoption levels of recommended practices concerning mango production, protection and marketing.	115
4.34.	Relationship between education level and respondents knowledge, skill, attitude and adoption level of recommended practices concerning mango production, protection and marketing.	116
4.35.	Relationship between tenancy status and respondents knowledge, skill, attitude and adoption level of recommended practices concerning mango production, protection and marketing.	118

4.36.	Relationship between size of land holding and respondents knowledge, skill, attitude and adoption level of recommended practices concerning mango production, protection and marketing.	119
4.37.	Relationship between age group and respondents knowledge, skill, attitude and adoption level of recommended practices concerning citrus production, protection and marketing	121
4.38.	Relationship between education level and respondents knowledge, skill, attitude and adoption level of recommended practices concerning citrus production, protection and marketing	122
4.39.	Relationship between tenancy status and respondents knowledge, skill, attitude and adoption level of recommended practices concerning citrus production, protection and marketing	124
4.40.	Relationship between size of land holding and respondents knowledge, skill, attitude and adoption level of recommended practices concerning citrus production, protection and marketing	126
4.41.	Relationship between age group and respondents knowledge, skill, attitude and adoption level of recommended practices concerning guava production, protection and marketing	128
4.42.	Relationship between education level and respondents knowledge, skill, attitude and adoption level of recommended practices concerning guava production, protection and marketing.	130
4.43.	Relationship between tenancy status and respondents knowledge, skill, attitude and adoption level of recommended practices	

	concerning guava production, protection and marketing.	132
4.44.	Relationship between size of land holding and respondents knowledge, skill, attitude and adoption level of recommended practices concerning guava production, protection and marketing.	134
4.45.	Relationship between age group and respondents knowledge, skill, attitude and adoption level of recommended practices concerning date production, protection and marketing.	136
4.46.	Relationship between education level and respondents knowledge, skill, attitude and adoption level of recommended practices concerning date production, protection and marketing.	137
4.47.	Relationship between tenancy status and respondents knowledge, skill, attitude and adoption level of recommended practices concerning date production, protection and marketing.	138
4.48.	Relationship between size of land holding and respondents knowledge, skill, attitude and adoption level of recommended practices concerning date production, protection and marketing.	139
4.49	Appropriate time for training program as reported by 317 respondents	140
4.50	Duration of courses for the training of fruit growers as reported by 317 respondents	141
4.51	Centre for Training of fruit growers as reported by 317 respondents	142

Chapter 5:	Summary, Conclusions and Recommendations	143
5.1	Summary	143
5.2	Conclusions	146
5.3	Recommendations	152
5.3.1	For the Deptt. of Agriculture (Ext.)	152
5.3.2	For the University of Agriculture Faisalabad	152
5.3.3	For fruit growers	153
5.3.4	For future researchers	153
5.4	References	154
5.5	Appendices	162
