

TABLE OF CONTENTS

1	Introduction	1
1.1	Proposed Numerical Techniques	3
1.1.1	The CESE Method	3
1.1.2	The Discontinuous Galerkin Finite Element Method	4
1.1.3	Central Schemes	4
1.1.4	Kinetic Flux Vector Splitting (KFVS) method	5
1.2	Achievements of the Project	6
1.3	Structure of the Thesis	8
1.4	Published / Submitted Articles	9
2	Theoretical Basis	11
2.1	Conservation Laws	12
2.2	Hyperbolic Conservation Laws	13
2.3	Weak Solution of Conservation Laws	14
2.4	Non-relativistic Euler Equations	15
2.5	The Riemann Problem	19
2.6	Special Relativity	19
2.6.1	Metric Tensor	20
2.6.2	Lorentz Transformations	20
2.6.3	Vectors and Tensors	21

2.6.4	4-Velocity	22
2.6.5	The stress-Energy Tensor	22
3	The Space-time CESE Method for SRHD Models	23
3.1	Special Relativistic Hydrodynamics	24
3.2	The CESE Method	27
3.2.1	One-Dimensional CESE Method	28
3.2.2	Two-Dimensional CESE Method	33
3.3	Central Schemes	40
3.3.1	One-Dimensional Central Scheme	41
3.3.2	Two-Dimensional Central Scheme	42
3.4	Numerical Tests	43
3.4.1	One-Dimensional Test Problems	43
3.4.2	Two-Dimensional Tests Problems	50
3.5	Summary	61
4	The Space-time CESE Method for URHD Models	63
4.1	Ultra-Relativistic Hydrodynamics	64
4.2	The CESE Method	65
4.3	The Godunov Upwind Scheme	66
4.4	Numerical Tests	67
4.4.1	One-Dimensional Test Problems	67
4.4.2	Two-Dimensional Test Problems	70
4.5	Summary	84
5	Application of DG FEM to the SRHD Models	85
5.1	Special Relativistic Hydrodynamic Equations	86

5.2	Discontinuous Galerkin Finite Element Method	86
5.3	The KFVS Method	91
5.4	Numerical Tests	94
5.4.1	Test Problems for the SRHD Equations	94
5.4.2	Test Problems for the URHD Equations	97
5.5	Summary	103
6	Conclusion and Future Work	105
6.1	Conclusion	106
6.2	Future Work	107
7	Appendices	109
8	References	113
