<b>Declaration</b>	iv
<b>Dedication</b>	v
<b>Acknowledgement</b>	vi
<b>Research Completion Certificate</b>	vii
<b>Summary</b>	viii
<b>Chapter-1: Introduction</b>	1
1.1 Role of Sampling	1
1.2 Use of Auxiliary Variable and Attribute	2
1.3 Application of Study in Real Life	3
1.4 Objectives of Study	4
1.5 Notations and Assumptions	4
<b>Chapter-2: Literature Review</b>	10
2.1 Introduction to Two-Phase Sampling	10
2.2 Shrinkage Estimator	12
<b>Chapter-3: Some Previous Estimators using Single Auxiliary Attribute</b>	13
3.1 Introduction	13
3.2 Estimators by Naik And Gupta (1996)	13
3.3 Family of Estimators by Jhajj et al. (2006)	13
3.4 Estimators by Shabbir and Gupta (2007)	15
3.5 General Shrinkage Estimator by Shahbaz and Hanif (2009)	16
<b>Chapter -4: Generalization of A Family of Estimators for Full Partial and No Information Cases using Multi- Auxiliary Attributes</b>	17
4.1 Introduction	17
4.2 A Generalized Family of Estimators for Single-Phase Sampling	17
4.2.1 Mean Square Error of $t_{8(1)}$	17
4.2.2 Mean Square Error of $t_{9(1)}$	18
4.2.3 Mean Square Error of $t_{10(1)}$	19
4.3 A Generalized Family of Estimators for Two-Phase Sampling	20
4.3.1 A Generalized Family of Estimators for Partial Information Case	20

4.3.1.1	Mean Square Error of $t_{11(2)}$	20
4.3.1.2	Mean Square Error of $t_{12(2)}$	21
4.3.1.3	Mean Square Error of $t_{13(2)}$	22
4.3.2	A Generalized Family of Estimators for No Information Case	23
4.3.2.1	Mean Square Error of $t_{14(2)}$	23
4.3.2.2	Mean Square Error of $t_{15(2)}$	24
4.3.2.3	Mean Square Error of $t_{16(2)}$	25
4.4	A Generalized Shrinkage Family of Estimators for Full Partial and No Information Cases	25
4.4.1	A Generalized Shrinkage Family of Estimators for Single-Phase Sampling	25
4.4.2	A Generalized Shrinkage Family of Estimators for Two-Phase Sampling for Partial Information Case	26
4.4.3	A Generalized Shrinkage Family of Estimators for Two-Phase Sampling for No Information Case	26
<b>Chapter -5: Generalization of Ratio and Product Estimator for Full Partial and No Information Cases using Multi - Auxiliary Attributes</b>		27
5.1	Introduction	27
5.2	Generalized Ratio Estimator for Full Partial and No Information Cases	27
5.2.1	Generalized Ratio Estimator for Single-Phase Sampling using “k” Auxiliary Attributes	27
5.2.2	Generalized Ratio Estimator for Two-Phase Sampling for Partial Information Case using “k” Auxiliary Attributes With m Known and (k-m) Unknown ( $m < k$ )	28
5.2.3	Generalized Ratio Estimator for Two-Phase Sampling for No Information Case using “k” Auxiliary Attributes	29
5.3	Generalized Shrinkage Ratio Estimator for Full Partial and No Information Cases	31
5.3.1	Generalized Shrinkage Ratio Estimator for Single-Phase Sampling using “k” Auxiliary Attributes	31
5.3.2	Generalized Shrinkage Ratio Estimator for Two-Phase Sampling for Partial Information Case using “k” Auxiliary Attributes With m Known and (k-m) Unknown ( $m < k$ )	31
5.3.3	Generalized Shrinkage Ratio Estimator for Two-Phase Sampling for No Information Case using “k” Auxiliary Attributes	31

5.4	Generalized Product Estimator For Full Partial and No Information Cases	32
5.4.1	Generalized Product Estimator for Single-Phase Sampling Using “k” Auxiliary Attributes	32
5.4.2	Generalized Product Estimator for Two-Phase Sampling for Partial Information Case using “k” Auxiliary Attributes With m Known and (k-m) Unknown (m<k)	33
5.4.3	Generalized Product Estimator for Two-Phase Sampling for No Information Case using “k” Auxiliary Attributes	34
5.5	Generalized Shrinkage Product Estimator for Full Partial and No Information Cases	36
5.5.1	Generalized Shrinkage Product Estimator for Single-Phase Sampling using “k” Auxiliary Attributes	36
5.5.2	Generalized Shrinkage Product Estimator for Two-Phase Sampling for Partial Information Case using “k” Auxiliary Attributes With m Known and (k-m) Unknown (m<k)	36
5.5.3	Generalized Shrinkage Product Estimator for Two-Phase Sampling for No Case Information Using “k” Auxiliary Attributes	36
<b>Chapter 6: A Family of Estimators for Full Partial and No Information Cases using Two – Auxiliary Attributes</b>		<b>38</b>
6.1	Introduction	38
6.2	A Family of Estimators for Full Partial and No Information Cases using Two Auxiliary Attributes	38
6.2.1	A Family of Estimators for Single-Phase Sampling	38
6.2.1.1	Bias and Mean Square Error Expression for $t_{32(1)}$	39
6.2.2	A Family of Estimators for Two-Phase Sampling for Partial Information Case	42
6.2.2.1	Bias and Mean Square Error Expression for $t_{42(2)}$	43
6.2.3	A Family of Estimators for Two-Phase Sampling for No Information Case	46
6.2.3.1	Bias and Mean Square Error Expression for $t_{53(2)}$	47
6.3	Theorem on Generalized Bias of Shrinkage Estimators	49
6.4	A Shrinkage Family of Estimators for Full Partial and No Information Cases using Two Auxiliary Attributes	50

6.4.1	A Shrinkage Family of Estimators for Single Sampling	51
6.4.2	A Shrinkage Family of Estimators for Two-Phase Sampling for Partial Information Case	51
6.4.3	A Shrinkage Family of Estimators for Two-Phase Sampling for No Information Case	52
<b>Chapter 7: Shrinkage Regression Type Estimators for Single and Two Phase Sampling using Single and Two Auxiliary- Attributes</b>		<b>53</b>
7.1	Introduction	53
7.2	A Shrinkage Regression Type Estimator using Single Auxiliary Attribute	53
7.2.1	A Shrinkage Regression Type Estimator for Single-Phase Sampling	53
7.2.2	A Shrinkage Regression Type Estimator for Two-Phase Sampling for No Information Case	54
7.3	A Shrinkage Regression Type Estimator using Two Auxiliary Attributes	56
7.3.1	A Shrinkage Regression Type Estimator for Single-Phase Sampling	56
7.3.2	A Shrinkage Regression Type Estimator for Two-Phase Sampling for Partial Information Case	57
7.3.3	A Shrinkage Regression Type Estimator for Two-Phase Sampling for No Information Case	59
<b>Chapter 8: Empirical Study</b>		<b>61</b>
8.1	Introduction	61
8.2	Conclusion	68
	REFERENCES	69
	APPENDIX	79
