

CONTENTS

DEDICATION	(i)
ACKNOWLEDGMENT	(ii)
LIST OF TABLES	(iv)
LIST OF FIGURES	(v)
LIST OF ABBREVIATIONS	(vi)

CHAPTER#	NAME OF CHAPTER	Page#
1.	INTRODUCTION	01
2.	REVIEW OF LITERATURE	05
	1. Tick Infestation	05
	1.1 Tick classification, structure and bionomics	05
	1.2 Prevalence study	06
	1.2.1 Ambient environmental conditions for ticks	06
	1.2.2 Prevalence study in Pakistan	07
	1.2.3 Prevalence study in other countries	08
	1.3 Host susceptibility to tick infestation	09
	1.4 Ticks as potential vectors of pathogens	10
	1.4.1 Pathogens vector by ticks	10
	1.4.2 Role of salivary gland in disease transmission	10
	1.4.3 Detection of pathogens in ticks	11
	1.5 Tick Infestation Based Economic Losses	13
	2. Control of ticks	15
	2.1 Chemotherapy	15
	2.2 Immunotherapy	17
	2.2.1 Antigen	17
	2.2.2 Development of immunity	18
	2.2.3 Commercial vaccines	19
	2.2.4 Development of new vaccines	20

	2. Growing intestinal cell as monolayer	21
	3. Summary	21
3.	MATERIALS AND METHODS	23
	1. Collection and Morphological study of tick	23
	2. Preparation of intestinal, salivary gland and whole homogenate tick vaccines and their inoculation into experimental animals	24
	3. Monitoring sero-conversion of vaccinated rabbits and calves	30
	3.1 AGPT	30
	3.2 CFT	33
	4. Monitoring capacity of <i>Hyalomma</i> whole homogenate tick vaccine in controlling tick infestation in crossbred animals by ELISA	39
	5. Detection of <i>T.annulata</i> by PCR	43
	6. Growing of intestinal epithelial cells of hard tick as monolayer	46
4.	RESULTS	49
	1. Tick prevalence in cattle and buffaloes	49
	2. Preparation of different whole homogenate oil based vaccines	51
	3. Monitoring sero-conversion of vaccinated rabbits and calves	52
	4. Monitoring efficacy of <i>Hyalomma</i> whole homogenate vaccine in Crossbred animals	55

	5. Detection of <i>T. annulata</i> in hard ticks by PCR	58
	6. Growing of intestinal epithelial cells of hard tick as monolayer	61
5.	DISCUSSION	62
	1. Prevalence study	62
	2. Detection of <i>T. annulata</i> in tick species by PCR	68
	3. Tick susceptibility due to differences in breed, sex and age of host	69
	4. Effects on tick reproductive efficiency by immunization	70
	5. Vaccination studies	74
	5.1 Different tick organ tissues as candidate antigen	74
	5.2 Cross-reactivity study	76
	5.3 Dose of antigen	79
	6. Growth of tick intestinal cell as monolayer	81
6.	SUMMARY	82
7.	LITERATURE CITED	84
8.	APPENDICES	108
