

Contents

1	Introduction.....	1
1.1	Swarm Intelligence for Optimization problems	1
1.2	Particle Swarm Optimization.....	2
1.3	Types of Optimization Problems	3
1.4	Research Overview	5
1.5	Contribution	6
1.6	Thesis Organization.....	7
2	Honey Bee Foraging Behavior Inspired PSO Algorithm	9
2.1	Introduction.....	9
2.2	Subswarms and Niching	10
2.2.1	Sub-swarm based PSO	10
2.2.2	PSO with Niching	12
2.2.3	Sub-swarm based PSO with Niching.....	13
2.2.4	PSO for Dynamic Optimization.....	14
2.3	Honey Bee Foraging Behavior Inspired Particle Swarm Optimization Algorithm (HBF-PSO).....	15
2.3.1	Related Work.....	16
2.3.2	Food Foraging Behavior of Honey Bees.....	17
2.3.3	HBF-PSO Algorithm	19
2.3.4	Summary of HBF-PSO Algorithm	21
2.3.5	Parameters of HBF-PSO	22
3	Experiments on HBF-PSO	25
3.1	Single Optimum in Multimodal Environments.....	25
3.1.1	Test Functions	25
3.1.2	Parameters	28
3.1.3	Performance Measures.....	29
3.1.4	Experiments on HBF-PSO	29

3.2	Multiple Optima in Multimodal Environments	31
3.2.1	Test Functions	31
3.2.2	Parameters	33
3.2.3	Performance Measure	33
3.2.4	Experiments on HBF-PSO	33
3.3	Dynamic Optimization Experiments	34
3.3.1	Test Function	34
3.3.2	Parameters	36
3.3.3	Performance Measures.....	37
3.3.4	Dynamic Optimization Results	37
4	Swarm Area, Swarm Size and Number of Swarms	39
4.1	Self Adjusting Neighborhood (HBF-PSOn)	39
4.1.1	Single Optimum in Multimodal Environments.....	42
4.1.2	Multiple Optima in Multimodal Environments	43
4.1.3	Dynamic Optimization Experiments	43
4.2	Species Identification Algorithm	44
4.2.1	Single Optimum in Multimodal Environments.....	46
4.2.2	Multiple Optima in Multimodal Environments	49
4.2.3	Dynamic Optimization Experiments	50
5	GP based Adaptable Velocity Update Equations	53
5.1	Introduction.....	53
5.2	Previous Work	54
5.2.1	PSO with Evolution	54
5.2.2	PSO with Multiple Velocity Update Equations.....	56
5.3	Adaptable Velocity Update Equations.....	58
5.3.1	Single Optimum Multimodal Environments	62
5.3.2	Multiple Optima in Multimodal Environments	64
5.3.3	Dynamic Optimization Experiments	64
5.4	Adaptable and Non-Adaptable Velocity Update Equations	66
5.4.1	Single Optimum in Multimodal Environments.....	67
5.4.2	Multiple Optima in Multimodal Environments	68
5.4.3	Dynamic Optimization Experiments	69

5.5	Adaptable and Non Adaptable Velocity Update Equations with Species Seeds	
	Algorithm	72
5.5.1	Single Optimum in Multimodal Optimization	74
5.5.2	Multiple Optima in Multimodal Environments	76
5.5.3	Dynamic Optimization Experiments	77
5.6	SPSOGP embedded in HBF framework	78
5.6.1	Single Optimum in Multimodal Optimization	78
5.6.2	Multiple Optima in Multimodal Environments	80
5.6.3	Dynamic Optimization Experiments	81
5.7	Usage Frequency of Update Equations.....	82
6	Incorporation of Opposition Based Learning	86
6.1	Opposition-based Learning	86
6.2	Existing Approaches Utilizing Opposition-based Learning with PSO	87
6.3	Proposed Method	88
6.4	Experiments and Results	95
6.4.1	Performance of OPSO Components	95
6.4.2	Single Optimum in Multimodal Environments.....	99
6.4.3	Multiple Optima in Multimodal Environments	100
6.4.4	Dynamic Optimization Experiments	102
7	Feedforward Neural Network Training.....	103
7.1	Feedforward Neural Networks.....	103
7.2	Training Feedforward Neural Networks with PSO	104
7.3	Experiments and Results.....	105
8	Conclusion	110
8.1	Comparison and Analysis	110
8.1.1	Multimodal Optimization Experiments	110
8.1.2	Comparison with Other Niching Algorithms	114
8.1.3	Dynamic Optimization Experiments	115
8.2	Achievements	115
8.2.1	Sub-swarm Based Approaches with Better Niching Capabilities	116
8.2.2	Hybrid algorithms with greater ability to maintain diversity.....	117
8.2.3	Application to feedforward neural network training.....	117

8.3 Future research directions	118
