Abstract	IX
Chapter 1 Introduction.....	1
1: Drug discovery strategy.....	2
1.1 : Selection of plant material.....	3
1.2: Preparation of plant extracts.....	8
1.3: Biological screening of plant extracts.....	9
1.3.1: Antimicrobial assays.....	10
1.3.2: Toxicity assays.....	16
1.3.3: Antitumor potato disc assay.....	17
1.3.4: Antioxidant assays.....	18
Determination of total phenolic contents.....	19
a. Antioxidant assays in aqueous system.....	20
b. Antioxidant assays in lipid system.....	22
1.4: Bioassay guided fractionation of selected plant extracts	23
1.5: Identification of components of plant extracts by analytical scale	
HPLC equipped with UV-DAD as well as LC-MS.....	23
1: Chromatography.....	23
2: Liquid chromatography-mass spectrometry (LC-MS).....	32
Chapter 2 Antimicrobial, toxicity and antitumor activities.....	34
Introduction.....	34
Materials and methods.....	35

2.1: Collection of plant material.....	35
2.2: Preparation of plant extracts.....	35
2.3: Antimicrobial assays.....	35
2.4: Toxicity assays.....	38
2.5: Antitumor potato disc assay.....	39
2.6: Antibacterial assay against <i>Agrobacterium tumefaciens</i>	40
Results.....	41
2.1: Antimicrobial assays.....	41
2.2: Toxicity assays.....	41
2.3: Antitumor potato disc assay.....	46
2.4: Antibacterial assay against <i>Agrobacterium tumefaciens</i>	46
Conclusion.....	52
Chapter 3 Antioxidant activities.....	53
Introduction.....	53
Materials and methods.....	54
3.1: Determination of total phenolic contents.....	54
3.2: Antioxidant activity.....	55
3.2.1: DPPH assay (1,1- Diphenyl-2-picryl-hydrazyl radical).....	55
3.2.2: Calculation of EC ₅₀ value.....	56
3.2.3: ABTS ⁺ Assay.....	56
3.2.4: TBARS (Thiobarbituric acid reactive substances) assay.....	57
3.3: DNA protection assay.....	58
Results.....	59
3.1: Determination of total phenolic contents.....	59

3.2: Statistical analysis.....	59
3.3: DPPH scavenging activity.....	63
3.4: ABTS ⁺ assay.....	63
3.5: TBARS (Thiobarbituric acid reactive substances) assay.....	64
3.6: DNA protection assay.....	74
Conclusion.....	74
Chapter 4 Semi-preparative HPLC.....	76
Introduction.....	76
Materials and methods.....	78
4.1: Preparation of samples.....	78
4.2: Spectrophotometric scanning of hexane washes and extracts.....	78
4.3: Semi-preparative HPLC.....	78
4.3.1: Sample Preparation.....	78
4.3.2: Method development for semi-preparative HPLC.....	78
4.3.3: Optimization of conditions for semi-preparative HPLC of (L+F)	
<i>S. nubicola</i>	79
4.3.4: Method for fractionation.....	81
4.4: Determination of total phenolic contents of fractions.....	82
4.5: Antioxidant activity of fractions.....	82
Results.....	83
4.1: Spectrophotometric scanning of hexane washes and crude extracts....	83
4.2: Semi-preparative HPLC.....	86
4.2.1: Method development for semi-preparative HPLC.....	86
4.3: Determination of total phenolic contents for three fractions.....	94
4.4: Antioxidant activity of fractions.....	94
Conclusion.....	99
Chapter 5 Identification of phenolic compounds.....	100
Introduction.....	100
Materials and methods.....	101
5.1: Preparation of samples.....	101
5.2: Preparation of standard.....	101

5.3: Analytical scale HPLC.....	101
5.3.1: HPLC Method.....	101
5.3.2: Regression lines for five external standards.....	102
5.3.3: Quantification of various peaks.....	102
5.4: LC-MS (Liquid chromatography mass spectrometry).....	103
5.5: Identification of phenolic components in crude plant extracts.....	103
Results.....	105
5.1: Analytical scale HPLC.....	105
5.2: Regression lines for five external standards by using analytical scale HPLC.....	112
5.3: Quantification of various peaks.....	112
5.4: LC-MS (liquid chromatography mass spectrometry).....	118
5.5: Identification of phenolic compounds.....	126
Conclusion.....	135
Chapter 6 Discussion.....	136
Conclusion.....	143
References.....	144
