Acknowledgements	iii
Abstract	iv
List of publications	v
Chapter 1: Introduction	1
1.1 General Consideration	1
1.2 Impedance Boundary Conditions	3
1.3 PEMC Boundary Conditions	4
1.4 Organization of the Thesis	5
Chapter 2: The Method and Prerequisites of Kobayashi Potential	7
2.1 The Method of Kobayashi Potential	7
2.1.1 Methodology	8
2.2 Mathematical Prerequisites of Kobayashi Potential	9
2.2.1 Hypergeometric Series	9
A. Definition and Properties	9
B. Integral Representation	10
C. Differential Equation of the Hypergeometric Function	11
2.2.2 Weber-Schafheitlin's Discontinuous Integrals	12
A. The Values of $W(\mu, \nu, \lambda; r)$ in the Limit $r \rightarrow 0$ and $r \rightarrow \infty$	12
B. Special Cases of Weber-Schafheitlin's Discontinuous Integrals	14
2.2.3 Jacobi's Polynomials	15
A. Definition	15
B. Differential Equation of the Jacobi's Polynomial and Its Orthogonal Properties	15
C. Integral Representation of the Jacobi's Polynomials $G(\alpha, \gamma, x)$	15
D. Special Cases of Jacobi's Polynomials	16
2.2.4 Spherical Bessel Functions	17

Chapter 3: Electromagnetic Diffraction from Strips	19
3.1 General Consideration	19
3.2 Diffraction of Electromagnetic Plane Wave by an Impedance Strip	19
3.2.1 Mathematical Formulation and Solution of the Problem	19
A. E-Polarization	20
B. H-Polarization	24
3.2.2 Physical Optics Solutions	26
A. E-Polarization	26
B. H-Polarization	26
3.2.3 Computations and Discussion	27
A. Computation of the Integrals	27
B. Diffracted Far Fields	30
C. Current Distribution on the Strip	30
3.2.4 Conclusion	30
3.3 Diffraction of Electromagnetic Plane Wave from a Conducting Strip placed on Dielectric Slab .	34
3.3.1 Formulation of the Problem	34
A. E-Polarization	34
B. H-Polarization	37
3.3.2 Computations and Discussion	39
A. Computation of Integrals $K_K(\nu, \mu)$ and $G_G(\nu, \mu)$	39
B. Field Patterns	39
3.3.3 Conclusion	40
3.4 Diffraction of Electromagnetic Plane Wave from a PEMC Strip	45
3.4.1 Formulation and Solution of the Problem	45
A. E-Polarization	45
B. H-Polarization	47
3.4.2 Results and Discussion	48
3.4.3 Conclusion	48
 Chapter 4: Electromagnetic Diffraction from Slit(s)	 53
4.1 General Consideration	53
4.2 Diffraction from a Slit in an Impedance Plane placed at the interface of Two Different Media .	53
4.2.1 Formulation and solution of the problem	53
A. E-Polarization	53
B. H-Polarization	56
4.2.2 Computations and Discussions	58
A. Evaluation of Integrals	58
B. Diffracted Far Field Patterns	60
4.2.3 Conclusion	60
4.3 Diffraction from Two Parallel Slits in an Impedance Plane	65
4.3.1 Statement of the Problem	65
4.3.2 Approximate Values of the Expansion Coefficients	70

4.3.3	Numerical Results and Discussion	77
4.3.4	Conclusion	78
4.4	Diffraction of Electromagnetic Plane Wave from a Slit In a PEMC Plane	80
4.4.1	Formulation and Solution of the Problem	80
A.	E-Polarization	80
B.	H-Polarization	82
4.4.2	Results and Discussions	83
4.4.3	Conclusion	83
Concluding Remarks		87
