

Chapter 1 Introduction	1
1.1 Preamble	1
1.2 Motivation	3
1.3 Research objectives	4
1.4 Outline of the Dissertation	4
References	6
Chapter 2 Literature survey	9
2.1 Introduction	9
2.2 High Velocity Oxyfuel coating process	10
2.3 Tungsten carbide cobalt coatings	11
2.4 HVOF Sprayed WC-Co coatings	17
2.5 Nanocrystalline WC-Co coatings	18
2.6 Synthesis and processing of duplex Co-coated WC-17Co powder	18
2.7 Applications	20
2.8 Abrasive wear behaviour of WC-cobalt coatings	20
2.8.1 Effect of hardness and fracture toughness	22
2.8.2 Effect of grain size and mean free path	23
2.8.3 Effect of applied load and sliding distance	24
2.9 Effect of carbide size and cobalt content on the microcrystalline and Mechanical properties of HVOF sprayed WC-Co coatings	24
2.10 WC phase stability	25
2.11 Effect of Feedstock Powder Particle Size	26
2.12 Evolution of HVOF sprayed nanocrystalline WC-Co coatings for better	

Performance	27
2.13 Summary	32
Reference	34
Chapter 3 Experimental Procedure	42
3.1 Introduction	42
3.2 Materials	42
3.3 Substrate preparation	43
3.4 Testing and characterization equipments	43
3.5 HVOF spray deposition	44
3.6 Characterization of powders and coatings	45
3.7 Hardness and toughness measurement	47
3.8 Wear test procedure	47
3.9 Fracture toughness	55
Reference	57
Chapter 4 Results and Discussion	59
4.1 Introduction	59
4.2 Feedstock powder	59
4.3 Powder characterization	60
4.4 Characterization of coatings	63
4.4.1 SEM and optical microscopic study of the coatings	63
4.4.2 XRD of coatings	66
4.5 Study of tribological behaviour	71
4.6 Effect of process parameters	73

4.7	Wear coefficient	74
4.8	Wear surface analysis	75
4.9	Fracture toughness measurement	90
4.10	Effect of sliding wear on microhardness	92
	Reference	96
	Chapter 5 Conclusions and Future work	100
5.1	Conclusions	100
5.2	Future Work	101
	Appendix-I	103
