List of Figures	viii
List of Abbreviation	ix
Abstract	x
Chapter 1 Introduction & Review of Literature	1-28
1.1 Objectives	3
1.2 Soybean Tissue Culture Studies: A Review	4
1.3 Soybean and <i>Agrobacterium</i> Interaction	9
1.4 In planta <i>Agrobacterium</i> mediated transformation	15
1.5 Rol genes: History and Transformation	16
1.6 <i>LEAFY</i> gene: A Review	24
Chapter 2 Materials and Methods	29-47
2.1 Direct Organogenesis of Soybean by Cotyledonary Node Half Seed Method	29
2.2 Soybean <i>Agrobacterium</i> Mediated Transformation: Conditions Standardization	33
2.3 <i>LEAFY</i> and rol gene Transformation in Soybean	38
2.4 Agroinjection to Soybean Pod: An Alternative Method of Transformation	45
Chapter 3 Results	48-83
3.1 Direct Organogenic Response of Soybean Cultivars	48
3.2 <i>Agrobacterium</i> mediated transformation: Some condition Standardization	55
3.3 <i>LEAFY</i> and rol gene Transformation	64
3.4 Soybean Tod treatment and analysis (Agroinjection to pods)	80

Chapter 4	Discussion	84-97
4.1	Direct Organogenic Response of Soybean from Cotyledonary Node Explants	84
4.2	Soybean <i>Agrobacterium</i> Mediated Transformation: Some Condition Standardization	86
4.3	<i>LEAFY</i> and rol gene transformation	91
4.4	Agroinjection to soybean Pods	95
4.5	General Discussion	97
Chapter 5	References	103-136
	Annexure	
	List of Publications
