

# TABLE OF CONTENTS

---

<b>1.0 General Introduction and Literature review.....</b>	<b>1</b>
1.1 Methyl parathion and Organophosphate Pesticides-----	1
1.1.1 Methyl parathion-----	1
1.1.2 Pharmacokinetics of methyl parathion-----	2
1.1.3 Methyl parathion toxicity revealed by animal models-----	2
1.1.4 Effects of environmental contamination with methyl parathion-----	5
1.1.5 Methyl parathion toxicity in humans-----	6
1.1.6 Current analytical techniques for methyl parathion detection-----	8
1.2 Paraoxonase 1 (PON1)-----	8
1.2.1 PON1 gene Polymorphisms-----	9
1.2.1.1 Q/R polymorphism in coding region (position 192)-----	9
1.2.1.2 PON1 L/M polymorphism-----	9
1.2.2 Physiological roles of PON1 protein-----	11
1.3 Problem statement-----	13
1.4 Objectives of the study-----	13
<b>2.0 Paraoxonase-1 Gene Polymorphism in Punjabi Population of Pakistan-----</b>	<b>14</b>
2.1. Introduction-----	14
2.2. Materials and methods-----	16
2.2.1 Study Population-----	16
2.2.2 Samples-----	16

2.2.3 Determination of PON1 SNPs-----	16
2.2.4 PON1 paraoxonase activity measurement -----	18
2.2.5 PON1 arylesterase activity measurement -----	19
2.2.6 Statistical analysis-----	19
<b>2.3. Results -----</b>	<b>20</b>
2.3.1 Demographic properties-----	20
2.3.2 PCR-RFLP-----	20
2.3.3 Allele and genotype frequencies-----	24
2.3.4 Frequencies of combined genotypes-----	24
2.3.5 Serum paraoxonase activities according to PON1 L55M and PON1 Q192R-----	26
2.3.6 Serum arylesterase activities according to PON1 L55M and PON1 Q192R-----	27
2.3.7. Combined results of paraoxonase and arylesterase activities according to PON1 L55M and PON1 Q192R-----	28
2.3.8. PON1 Enzyme activities with respect of combined genotypes-----	29
<b>2.4. Discussion-----</b>	<b>30</b>
<b>2.5. Conclusions-----</b>	<b>37</b>
<b>3.0 (Case study-2): Paraoxonase-1 Genotypes and Enzyme Activities in Pakistani (Punjabi) Pesticide Sprayers: Identification of Population Susceptible to Risk of Pesticide Toxicity-----</b>	<b>38</b>
<b>3.1. Introduction-----</b>	<b>38</b>
<b>3.2. Materials and methods-----</b>	<b>40</b>

3.2.1. Study Population-----	40
3.2.2. Methods -----	40
<b>3.3. Results-----</b>	<b>41</b>
3.3.1. Study population-----	41
3.3.2. Types of pesticides used-----	42
3.3.3. Personal Protective Equipments (PPEs)-----	43
3.3.4. Safety Precautions about wind direction-----	44
3.3.5. Safety precautions after working with pesticides-----	45
3.3.6. Sources of training and guidance-----	46
3.3.7. Direct body contact with pesticides during work-----	47
3.3.8. Signs and symptoms of acute toxicity recorded in affected individuals----	48
3.3.9. PON1 SNPs-----	49
3.3.10. Serum arylesterase activities according to PON1 L55M and PON1 Q192R----- -----	53
3.3.11. Serum paraoxonase activities according to PON1 L55M and PON1 Q192R----- -----	54
3.3.12. Serum arylesterase activities according to combined genotypes-----	55
3.3.13. Serum paraoxonase activities according to combined genotypes -----	56
<b>3.4. Discussion: -----</b>	<b>57</b>
<b>3.5. Conclusions:-----</b>	<b>64</b>
<b>4.0 Serum Paraoxonase and Arylesterase Activity in Familial Hypercholesterolemia Patients with Mutated <i>LDLR</i> Gene-----</b>	<b>65</b>

<b>4.1. Introduction</b>	<b>65</b>
<b>4.2. Patients and Methods</b>	<b>67</b>
4.2.1 Subjects	67
4.2.2. Methods	67
<b>4.3. Results</b>	<b>68</b>
4.3.1. Demographic characteristics	68
4.3.2. Pedigree and PCR-RFLP results	69
4.3.3. Prevalence of PON1 genotypes	71
4.3.4. Serum arylesterase activities according to PON1 L55M and PON1 Q192R	75
4.3.5. Serum paraoxonase activities according to PON1 L55M and PON1 Q192R	76
4.3.6. Serum arylesterase activities according to combined genotypes	77
4.3.7. Serum paraoxonase activities according to combined genotypes	78
<b>4.4. Discussions</b>	<b>79</b>
<b>4.5. Conclusions</b>	<b>83</b>
<b>5.0. (Case study-4): Serum Paraoxonase and Arylesterase Activity in Primary Glaucoma Patients</b>	<b>84</b>
<b>5.1. Introduction</b>	<b>84</b>
5.1.1. Normal eye structure and flow of Aqueous humor	86
5.1.2. Difference between normal eye and glaucoma	87
5.1.3. Difference between OAG and CAG	88

5.1.4. Optic nerve damage due to glaucoma -----	89
5.1.5. Altered visual field due to glaucoma-----	90
<b>5.2. Patients and Methods-----</b>	<b>91</b>
5.2.1. Subjects:-----	91
5.2.2. Methods:-----	93
<b>5.3. Results:-----</b>	<b>94</b>
5.3.1. Comparison of PON1 genotypes distribution-----	96
5.3.2. Serum arylesterase activities according to PON1 L55M and PON1 Q192R----- -----	99
5.3.3. Serum arylesterase activities according to PON1 L55M and PON1 Q192R----- -----	100
5.3.4. Serum arylesterase activities according to combined genotypes-----	101
5.3.5. Serum paraoxonase activities according to combined genotypes-----	102
<b>5.4. Discussions:-----</b>	<b>103</b>
<b>5.5. Conclusions:-----</b>	<b>106</b>
<b>6.0 Detection of Methyl Parathion by Using Purified Green Fluorescent Protein (GFPuv) as a Biosensor Molecule-----</b>	<b>107</b>
<b>6.1 Introduction-----</b>	<b>107</b>
<b>6.2. Materials and Methods-----</b>	<b>108</b>
6.2.1. Selection of Fluorescent protein -----	108
6.2.2. Expression and purification of GFPuv-----	108
6.2.3. Fluorescence assay-----	109

<b>6.3. Results:</b> -----	<b>110</b>
6.3.1. Expression of GFPuv -----	110
6.3.2. IMAC purification of GFPuv -----	111
6.3.3 FPLC -----	112
6.3.4 Fluorescence quenching assay -----	113
<b>6.4 Discussions</b> -----	<b>114</b>
<b>6.5 Conclusions</b> -----	<b>118</b>
<b>7.0 Characterization of a Novel Fluorescent Protein from <i>Hydnophora rigida</i> with Green Emission</b> -----	<b>119</b>
<b>7.1. Introduction</b> -----	<b>119</b>
<b>7.2. Materials and Methods</b> -----	<b>120</b>
7.2.1 HriGFP expression and purification -----	120
7.2.2 Dynamic light scattering (DLS) -----	120
7.2.3 Peptide Mass Finger print (PMF) -----	121
7.2.4 Searching for similar proteins -----	121
7.2.5 Identification of fluorophore -----	121
7.2.6 Structure Prediction on the basis of similar templates -----	122
<b>7.3. Results</b> -----	<b>125</b>
7.3.1 HriGFP expression and purification -----	125
7.3.2 The Dynamic Light Scattering (DLS)-----	126
7.3.3 The peptide mass fingerprint -----	126
7.3.4. Sequence analysis Results -----	127

7.3.5. Phylogenetic tree -----	128
7.3.6. Homology modeling: prediction of 3D structure -----	131
7.3.7. Fluorophore identification -----	132
<b>7.4. Discussions -----</b>	<b>133</b>
<b>7.5. Conclusions -----</b>	<b>137</b>
<b>8.0. Methyl Parathion Biodegradation: Isolation and Characterization of Methyl Parathion Utilizing Bacterial Isolates for Bioremediation Applications -----</b>	<b>138</b>
<b>8.1. Introduction-----</b>	<b>138</b>
<b>8.2. Materials and methods-----</b>	<b>139</b>
8.2.1. Soil Samples for bacterial isolation -----	139
8.2.2. Isolation of Methyl parathion utilizing bacteria -----	142
8.2.3. Selection of pure bacterial colonies -----	142
8.2.4. Identification of isolates -----	143
8.2.5. Methyl parathion Hydrolase assay -----	143
8.2.6. Heavy Metal tolerance -----	144
8.2.7. Antibiotic resistance -----	144
8.2.8. PCR for integrons and antimicrobial resistance genes -----	145
<b>8.3. Results -----</b>	<b>148</b>
8.3.1 Methyl parathion utilizing bacterial isolates -----	148
8.3.2. Heavy Metal tolerance -----	150
8.3.3. Antibiotic resistance -----	151

9.3.5. GFP expression in sol-gel immobilized cells -----	171
<b>9.4. Discussions -----</b>	<b>173</b>
<b>9.5. Conclusions -----</b>	<b>176</b>
<b>10.0. References -----</b>	<b>177</b>
<b>11.0 Appendices -----</b>	<b>217</b>
11.1. General Performa for PON1 Studies Participants -----	224
11.2. Additional Information of PON1 Studies Participants -----	226
<b>12.0 List of Published Research work-----</b>	<b>231</b>
