

mg /kg), while National feed had lowest mean concentration 2.3 mg/kg as compared to other feed brands. The mean concentrations of cadmium were obtained in a range of 23.6 to 33.6 mg/kg. The Super Star feed brand had higher means concentration of cadmium (33.6) mg/kg was obtained as compared to other feed brands while Ghazi feed had lowest concentration 23.6 mg /kg.

Contents

Chapter 1

1. Introduction.....	1
1.2. Trace and toxic elements in Feed.....	4
1.3 Objective of Study.....	6

Chapter 2

REVIEW OF LITERATURE

2.1 Bacterial diseases.....	7
2.1.1. <i>Salmonella Pullorum</i>.....	7

2.1.2 Fowl cholera.....	10
2.2 Viral poultry diseases	14
2.2.1 Hydropericardium.....	14
2.2.2 Newcastle virus disease.....	17
2.2.3 Marek’s virus disease	21
2.2.4 Infectious bursal disease.....	24
2.2.5 Infectious bronchitis	30
2.3 Analysis of trace elements in broiler feed.....	33

CHAPTER- 3

MATERIAL AND METHOD

3.1 Source of data.....	39
3.1.1 Examination of affected organs.....	40
3.1.2 Postmortem Examination.....	40
3.1.3 Procedure of postmortem examination.....	40
3.2 Analysis of trace elements from commercial broilers feed.....	41
3.2.1 Source of sampling of feed.....	41
3.2.2 Preparation of feed samples for analysis of trace elements.....	42
3.3 Statistical analysis of data.....	42

CHAPTER- 4

RESULTS AND DISCUSSION

4.1 Trends and patterns of bacterial and viral diseases of commercial broilers.....	43
4.1.1 Bacterial diseases broilers	43

4.1.1.1 <i>Salmonella Pullorum</i>	43
4.1.1.1.1 Birds affected due to <i>Salmonella Pullorum</i>	43
4.1.1.1.2 Birds died due to <i>Salmonella Pullorum</i>	43
4.1.1.1.3 Birds survived from <i>Salmonella Pullorum</i>	44
4.1.1.1.4 Trends and patterns of <i>Salmonella Pullorum</i>	44
4.1.1.2 Fowl cholera.....	47
4.1.1.2.1 Birds affected due to Fowl cholera.....	47
4.1.1.2.2 Birds died due to Fowl cholera.....	47
4.1.1.2.3 Birds survived from Fowl cholera.....	48
4.1.1.2.4 Trends and patterns of Fowl cholera.....	48
4.1.2 Viral Poultry diseases	51
4.1.2.1 Hydropericardium syndrome disease.....	51
4.1.2.1.1 Birds affected due to Hydropericardium syndrome disease.....	51
4.1.2.1.2 Birds died due to Hydropericardium syndrome disease.....	51
4.1.2.1.3 Birds survived from to Hydropericardium syndrome disease.....	52
4.1.2.1.4 Trends and Patterns of Hydropericardium syndrome.....	52
4.1.2.2 Newcastle virus disease	55
4.1.2.2.1 Birds affected due to Newcastle disease	55
4.1.2.2.2 Birds died due to Newcastle disease.....	55
4.1.2.2.3 Birds survived from Newcastle disease.....	56
4.1.2.2.4 Trend and pattern of Newcastle disease.....	56
4.1.2.3 Marek's Virus disease	59
4.1.2.3.1 Birds affected due to Marek's disease.....	59
4.1.2.3.2 Birds died due to Marek's disease.....	59
4.1.2.3.3 Birds survived from Marek's disease.....	60
4.1.2.3.4 Trend and Pattern of Marek's disease.....	60

4.1.2.4 Infectious bursal disease.....	63
4.1.2.4.1 Birds affected due to Infectious bursal disease.....	63
4.1.2.4.2 Birds died due to Infectious bursal disease.....	63
4.1.2.4.3 Birds survived from Infectious bursal disease.....	63
4.1.2.4.4 Trend and pattern of Infectious bursal disease.....	64
4.1.2.5 Infectious Bronchitis.....	67
4.1.2.5.1 Birds affected due to Infectious bronchitis.....	67
4.1.2.5.2 Birds died due to Infectious bronchitis.....	67
4.1.2.5.3 Birds survived from Infectious bronchitis.....	68
4.1.2.5.4 Trend and pattern of Infectious bronchitis.....	68
4.2 Results of Pathological lesions observed from bacterial and viral diseases.....	71
4.2.1 Bacterial diseases.....	71
4.2.1.1 <i>Salmonella Pullorum</i>	71
4.2.1.1.1 Clinical pictures	71
4.2.1.1.2 Postmortem Examination and pathological lesions.....	71
4.2.1.2 Fowl cholera.....	79
4.2.1.2.1 Clinical pictures.....	79
4.2.1.2.2 Post mortem examination and pathological lesions.....	79
4.2.2 Viral poultry diseases.....	86
4.2.2.1 Hydropericardium Syndrome.....	86
4.2.2.1.1 Clinical pictures.....	86
4.2.2.1.2 Postmortem examination and pathological lesions.....	86

4.2.2.2 Newcastle disease virus.....	92
4.2.2.2.1 Clinical pictures.....	92
4.2.2.2.2 Postmortem examination and pathological lesions.....	92
4.2.2.3 Mark's disease virus.....	98
4.2.2.3.1 Clinical pictures	98
4.2.2.3.2 Postmortem examination and pathological lesions	98
4.2.2.4 Infectious bursal disease.....	106
4.2.2.4.1 Clinical pictures.....	106
4.2.2.4.2 Postmortem examination and pathological lesions.....	106
4.2.2.5 Infectious bronchitis disease.....	110
4.2.2.5.1 Clinical pictures and pathological lesions.....	110
4.2.2.5.2 Postmortem examination and pathological lesions.....	110
4.3 Analysis of trace elements from broiler feed brands.....	114
4.3.1 Concentrations of zinc (Zn), iron (Fe), copper (Cu), manganese (Mn), chromium (Cr) and cadmium (Cd) in different brands of commercial broiler feed (mg/kg).....	114

DISSCUSSION

5.1 Bacterial diseases.....	120
5.1.1 <i>Salmonella Pullorum</i>	120
5.1.2 Fowl cholera.....	121
5.2 Viral poultry diseases.....	123

5.2.1 Hydropericardium syndrome disease.....	123
5.2.2 Newcastle disease	126
5.2.3 Mareks disease	128
5.2.4 Infectious bursal disease	131
5.2.5 Infectious bronchitis disease.....	133
5.3 Analysis of trace elements from broilers feed brands.....	133
