

TABLES OF CONTENTS

Chapter	Contents	Page No.
1	INTRODUCTION.....	1
	Background.....	1
	Surface water.....	1
	Groundwater.....	4
	Groundwater Issues.....	5
	Groundwater quality.....	5
	Pumping Inefficiencies.....	7
	Groundwater management.....	8
	Objectives of the study.....	10
2	REVIEW OF LITERATURE.....	12
	Groundwater importance, quality and issues.....	12
	VES potential.....	14
	Aquifer characteristics.....	22
	Auditing of tubewells.....	26
	Summary.....	27
3	MATERIALS AND METHODS.....	29
	Study area.....	29
	Chaj Doab.....	29
	Rachna Doab.....	29
	Selected sites.....	29
	Phase I.....	31
	Phase II.....	33
	Phase III.....	35
	Geology and Hydrogeology of the study area.....	37
	Sources of salinity in the research area.....	39
	Criteria for water suitability.....	39
	Hydrogeological parameters.....	39
	Hydraulic conductivity and transmissivity.....	41
	Electrical conductivity.....	42

Surface electrical resistivity surveying methods of investigation.....	43
Introduction.....	43
Geoelectrical Vertical Electrical Sounding (VES) resistivity survey.....	43
Resistivity measurements.....	46
Apparent resistivity.....	48
Electrode configuration.....	48
Investigation techniques.....	51
Equipment used in this study.....	52
Depth of investigation.....	53
Interpretation of VES survey data using IX1D software.....	55
Correlation of VES results and borehole data.....	57
VES relationship with water quality and Hydrogeological parameters.....	59
Determination of aquifer properties.....	61
Longitudinal conductance and transverse resistance.....	62
Statistical analysis.....	63
Inter-Variable Correlation.....	63
Inter-Variable Covariance.....	64
Planar regression.....	64
Spatial randomness.....	64
Summary of research methodology.....	65
4 RESULTS AND DISCUSSIONS.....	68
PHASE I.....	68
VES Results.....	68
Interpretation of subsurface layered model.....	73
Correlation of VES results with drilled boreholes.....	79
Correlation between current electrode spacings (AB/2) and current penetration depth.....	82
Correlation between earth resistivity and EC of soil and water.....	83
Resistivity zones.....	86
Very low resistivity zone.....	87
Low resistivity zone.....	87

Medium resistivity zone.....	87
High resistivity zone.....	87
Very high resistivity zone.....	88
VES results and well site selection.....	88
Rachna 1.....	91
Rachna 2.....	91
Rachna 3.....	92
Chaj 1.....	93
Chaj 2 and Chaj 3.....	93
PHASE II.....	94
VES Results.....	94
Well data.....	96
Analysis of VES survey and Audits.....	97
Audit C1.....	97
Audit C2.....	99
Audit C3.....	101
Audit R1.....	103
Audit R2.....	103
Audit R3.....	105
Auditing summary.....	108
Aquifer properties.....	111
PHASE III.....	115
Interpretation of subsurface layered model.....	115
Types of interpreted field curves.....	118
Groundwater resistivity estimation from VES data.....	130
Geoelectrical model.....	133
Top layer resistivity.....	136
Shallow aquifer resistivity.....	143
Deep aquifer resistivity.....	148
Comparison between groundwater quality in shallow and deep aquifer.....	153
Chaj Doab.....	153
Rachna Doab.....	157
Longitudinal conductance and transverse resistance.....	160

	VES Interpreted data statistics.....	163
5	CONCLUSIONS AND RECOMMENDATIONS.....	166
	Conclusions.....	166
	Phase I.....	166
	Phase II.....	167
	Phase III.....	168
	Recommendations.....	168
6	SUMMARY.....	170
7	REFERENCES.....	172
8	ANNEXURES.....	182
	Annexure I Field data recording sheet.....	182
	Annexure II Basic statistical formulae.....	183
	Annexure III Software output model (IX1D) of VES survey data in Phase I sites.....	184
	Annexure IV Software output model (IX1D) of VES survey data in Phase II sites.....	194
	Annexure V	206
	Annexure V-A Table showing the names of farmers with locations and VES positions sites in Chaj Doab.....	206
	Annexure V-B Table showing the names of farmers with locations and VES positions in Rachna Doab.....	208
	Annexure V-C Table showing the surface and water table elevations from sea level at VES sites in Chaj Doab	210
	Annexure V-D Table showing the surface and water table elevations from sea level at VES sites in Rachna Doab.....	211
	Annexure VI Statistical analysis of resistivity data.....	212
	Annexure VII	218
	Fig. VII A. Resistivity meter ABEM, (SAS 4000, Sweden) with accessories.....	218
	Fig. VII A. VES survey in progress at sites C13 and R28.....	219
	Fig. VII A. Groundwater samples collection for tubewell auditing at site Audit C3.....	220
	Fig. VII A. Drilling operation for soil and groundwater samples collection to prepare well log.....	221
